Reasons for comment:

Comments: We don't oppose having the air conditioning installed, we just don't appreciate the location of the ac unit, mounted next to the window on the side of the house, above the fence line visible for us to see.

I want to reference a pre-planning application advice I submitted to yourselves in 2024. Ref. DM/24/2129
Your Caroline Grist suggested she wouldn't support developing over our garage as it would block the views looking south for the house in Sumners (No.4)
Yet somehow this opinion wasn't factored in for the original development, and therefore we now face the new house at the end of the our garden looking SOUTH!
So to then have an air-con unit visible would add to our frustration with this.
Suggestion to relocate the air-con unit to a lower height below the fence line.

I trust you can all appreciate why having the AC unit visible and blowing air in our direction would be frustrating. With this current plan the ac unit would be around 1m from our boundary.

Please note I have several correspondance with MSDC (Hamish in particular) over the fence that was installed by the builder not being fit for purpose. If the air con design was

more considerate to the surrounding properties then we can avoid all the frustration that this would cause.

Regards
