Juhring Field Parking

- 760 Proposed Spaces
- 5% Electric Vehicle (EV) space with 15% EV ready.
- Lighting to be provided and ensured to only light the area when safety and security requirements.
- For Lighting design see lighting report
- Road ways are intended to be Asphalt for continuous and durable use.
- Areas for ecological enhancement
- Pathways finished in permeable tan toned surface similar to road way. potentially composed of recycled materials.
- Majority of field and parking spaces covered by Cellweb or similar product. This is to encourage grass to continue making up the majority of the field while providing a durable, low maintenance surface for parking all year. Option to infill with gravel instead of grass.
- Roads near root areas to be GEOCELL for allowing vehicle access whilst protecting tree roots (or similarly applied products).
- Infill areas between hardstanding and event space to be designated for rewilding. The intention of this is to replace the loss of grassland with more eco diverse wild areas.
- Roadways and paths to be lit in similar pattern to existing site to unify scheme with castle grounds.
