

Application to carry out work on trees at
11 Redwood Drive, Haywards Heath, RH164ER

House Owners : Mr Edward & Mrs Patricia Hazelwood

Date : 14 August 2026

Trees concerned :

A number of Sweet Chestnuts on the West and South boundaries of the property.

They have, in the distant past, been coppiced so therefore three of them have two or three trunks from one root-base.

They were last cut back in Sep 2020 after application reference DM/20/1919

Current situation :

The number of trees is 12. This includes some where there are two trunks from a common root base of a previously coppiced tree.

They have now regrown and spread so that they are reducing light to our garden and the gardens of our immediate neighbours. Most pressingly, some are now touching our house. In addition, they now have grown top heavy with thicker growth.

Works requested :

Our tree-surgeons have previously recommended that, as the trees have been previously pollarded, they will need to be cut back to the previous cut points. This will result in growth being reduced by between 3 and 5 meters, depending on the tree. (The longer branches are those growing towards the light). There is significant epicormic growth that will need trimming back.

We wish to carry out this work later this year.

Neighbours affected :

12 Redwood Drive (Shared boundary with tree on property line).

7, 8, 9 and 10 Ash Grove (Overhanging branches)

19 Southdown Close (Small amount of overhang from one tree)
