Comments Details

Commenter Type:	Other type - not listed
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	Due to current weather climates, and experiencing adverse weather conditions that leaves many grass pitches unplayable, more and more children , women and disability teams are missing out on regular football sessions / matches because there is no all weather (3G) pitches available to play on. Changing the grass pitch into a 3G pitch ensures that the majority of games and training can go ahead , despite the weather. More and continual football, especially for the minority groups , is crucial and valuable

for mental health, well being, fitness , sportsmanship and friendship.

Football is a powerful force that brings all different walks of life together and for the better. It's so frustrating that because of a pitch being unplayable , all because of the weather , so many people have to miss out, when the simplest of solutions is providing a suitable surface that can be used all year round, come rain or shine !

Kind regards
