Address: 12 Allens Close Ashurst Wood East Grinstead

Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I wish to object to this planning application due to the impact it will have on my privacy, light and overall enjoyment of my property. The window on the north side, although serving as a bathroom, is being brought much closer to my boundary which increases the sense of being overlooked and affects my privacy in both the house and the garden. The proposal involves a significant increase in height and mass of the north side elevation across the rear of my property. This includes not only raising the roofline of the single story section but

also extending and squaring off other parts to create a continuous two story building. This replaces what is currently a varied and broken profile. From my garden this will appear as a large imposing wall that feels overbearing and dominate.

Currently my outlook includes open sky and modest rooflines.

The proposed changes would obstruct this view, reduce the feeling of openness and cast shadows particularly in the mornings and late afternoons as my garden is south facing. This will reduce natural light and negatively affect how I use my outdoor space.

I'm also concerned about the impact on light within my home. The increased height and proximity of the new structure could block daylight to rear facing rooms especially on the ground floor making them feel darker and in closed.

Overall, the proposal would have a negative effect of mine and my family's well being and enjoyment of our garden and home.

Kind regards
