

Existing Fence Panel = 1.53m high

Existing brick wall estimated here at 0.8m but
Min height of wall bordering pavement = 0.7m
Max height of wall bordering pavement = 1.05m

Although the above suggests a total height of up to 2.58m the grass on which the fence is situated is 30-40cm lower than the wall itself so total height from the pavement is actually 2.2m
