[REDACTED]
Dear Mr Watt

We live at 3 cheney crescent next door to above mentioned property and would like to add the following comments concerning the proposed application.

The proposed dormer would be a large structure not in keeping with the rest of the nine property terrace as other properties with loft conversions have just got velux windows on the roof. The proposed dormer would also block early morning sunlight onto our garden.

We would also be concerned about contractors walking on our tiled roof in order to carry out work to install solar panels and velux windows due to the hipped roof to the front of number 5.

Yours sincerely
