Dear Stefan,

Thank you for consulting the flood risk and drainage team in relation to the above prior Approval application.

The proposed development is for the change of use from less vulnerable use (agricultural building) to more vulnerable use (dwelling).

There is no increase in built footprint at ground level as part of the development.

Due to the very low flood risk and type of development the flood risk and drainage team have no objection to the development.

As a change of use the flood risk and drainage team would advise that foul and surface water drainage can be managed via Building Regulations and Building Control where relevant.

Best Wishes

Flood Risk and Drainage Team
Estate Services and Building Control
