| Please identify the tree(s) and provide a full and clear specification of the works you want to carry out | <p>We would like to seek permission to fully remove (fell) two trees at our property (Arosa, Oldlands Avenue). Details are as follows:</p> <p>1. London Plane tree – front garden (site 1 on the sketch plan). The reasons are as follows: It sheds a very large volume of leaves each autumn, which causes ongoing issues for both ourselves and our neighbours at Oldland (to the west of the property). The debris regularly blocks gutters, drains and pathways, creating a slipping hazard on our driveway and requires continual clearance throughout most of the year. This London Plane tree is a non-native species and offers limited biodiversity value compared to native alternatives. In its current setting, the tree provides limited amenity value, and its removal would prevent further nuisance and maintenance problems. There have been two reductions in height for this tree in the past ten years; a 2m reduction in 2016 and a further 1m reduction in 2021.</p> <p>2. Larch tree – rear garden (site 2 on the sketch plan). The reasons are as follows: The larch has shown noticeable movement during recent storms, raising serious concern that its root system may be unstable. Both our home and the neighbouring property (The Coppice) are in close proximity, and there is significant risk of damage (to The Coppice or our house) if the tree were to fall. Its position to the south-west of the neighbouring property (The Coppice) makes it particularly vulnerable to the prevailing south-westerly winds, further increasing the likelihood of storm damage. It blocks significant light from our neighbour's property and garden (The Coppice), making it difficult for them to enjoy their outdoor space and casts a significant shadow across the back of their house throughout the year. The tree has an irregular, warped trunk and the canopy is heavily one-sided, resulting in poor form and little visual amenity from neighbouring gardens to the east of Arosa. This is a non-native species and not in keeping with the character of the local landscape.</p> <p>Proposed replanting/mitigation<br/>We fully appreciate the importance of maintaining tree cover and would be happy to replant more suitable species in place of the removed trees. These could be smaller, native varieties (such as rowan, crab apple, or hawthorn) that provide biodiversity benefits without creating nuisance or overshadowing neighbouring properties.</p> |
