Dear Andy,

Thank you for consulting the Flood Risk and Drainage Team on the above application.

We understand the proposed application is for the refurbishment of the existing Sports Hall roof, installation of new TATA Trisomet 120mm insulated composite roof panels; installation of roof-mounted photovoltaic panels; and a minor localised alteration to the eastern roof slope to remove the existing internal valley and form a simple gable end, with the roof plane raised by approximately 150mm.

As there will be no increase in built footprint, change of use or increase in vulnerability at the site.

We have no objection to the proposed development on flood risk grounds.

Drainage should be managed via Building Regulations and Building Control, as necessary.

Best Wishes

Flood Risk and Drainage Team
Estate Services and Building Control
