Eligibility

Permitted development rights are subject to conditions set by legislation to ensure that only appropriate proposals are eligible. The need to apply to the Local Planning Authority to see if prior approval is required is one such condition.

This permitted development right was amended on 21 May 2024 to broaden the range of buildings that could be converted to dwellings, allow extensions to the building, and to increase the total number of dwellings from 5 to 10.

However, the right was also updated to:

- No longer permit the creation of any dwelling with a floorspace over 150 square metres (previously, 'larger' dwellings could be up to 465 square metres)
- Remove the eligibility of any building that does not have suitable existing access to a public highway (previously, this was not an eligibility requirement)

Proposals that do not meet the above criteria are temporarily allowed to use the previous version of the permitted development right, though this will mean you are not able to benefit from any of the amendments made.

Select the checkbox below if you wish to use the previous version. Otherwise you should continue through this application, which is based on the current legislation as amended.

- ☐ **I/We confirm that this application will use the permitted development right as it stood prior to 21 May 2024.** In confirming this, I/we understand that:
- The application must be received by the local authority by 20 May 2025 (the payment process on Planning Portal must be completed before the application will be submitted).
 - The [supplementary information template](#) covering the pre-21 May 2024 eligibility criteria and information requirements must be downloaded, completed and attached as a supporting document.
 - Failure to do either of the above could result in application being refused without the fee being refunded.

Is the site currently part of an established agricultural unit?

- ☒ Yes
☐ No

Was the site part of an established agricultural unit on 24 July 2023?

- ☒ Yes
☐ No

Has any work under the permitted development rights for the erection, extension or alteration of a building reasonably necessary for the purposes of agriculture been carried out on the agricultural unit during the 10 year period before development begins?

- ☐ Yes
☒ No

Will the external dimensions of the resulting building(s) extend beyond the existing building(s) at any point, other than:

- as a result of any permitted extension to the building under this permitted development right; or
- by more than 0.2 metres as a result of any permitted building work or other operations under this permitted development right.

☐ Yes

☒ No

Will any proposed extension:

- be more than 1 storey;
- be sited anywhere other than the rear of existing building;
- extend beyond the rear wall of existing building by more than 4 metres;
- extend beyond side or principal elevations of the existing building;
- create eaves higher than the height of the current building's eaves;
- be higher than the highest part of the roof of the existing building, or exceed 4 metres in height;
- be on land that is not already covered by a hard surface, with that hard surface having existed on or before 24th July 2023 or, where the hard surface was provided after 24th July 2023, has been in place for at least 10 years before development begins.

☐ Yes

☒ No / No extension proposed

Does the new building have suitable access to a public highway?

☒ Yes

☐ No

Is the existing building (including any permitted building work or other operations, but excluding any proposed extension), capable of complying with the nationally described space standard?

☒ Yes

☐ No

NOTE: Please note: Any new dwellinghouse will only be eligible for permitted development rights if it has a gross internal floor area of at least 37 square metres, and complies with the [nationally described space standard](#).

Is any part of the land, site or building:

- in a conservation area;
- in an area of outstanding natural beauty;
- in an area specified by the Secretary of State for the purposes of enhancement and protection of the natural beauty and amenity of the countryside;
- in the Broads;
- in a National Park;
- in a World Heritage Site;
- in a site of special scientific interest;
- in a safety hazard area;
- in a military explosives storage area;
- a scheduled monument (or the site contains one);
- a listed building (or within the curtilage of a listed building)

☐ Yes

☒ No

Agricultural tenants

To be eligible for this permitted development right, all parties to any agricultural tenancy agreements that are currently in place, or that have been terminated in the year before development is proposed to begin, need to provide consent.

This is to help ensure that agricultural tenants are not displaced to allow a change of use to be carried out.

Is the site currently occupied under any agricultural tenancy agreements?

☐ Yes

☒ No

Have any agricultural tenancy agreements been terminated in the year before development is proposed to begin for the purpose of carrying out the proposed change of use?

☐ Yes

☒ No

Dwellinghouses and floor space

This permitted development right was amended on 21 May 2024 to broaden the range of buildings that could be converted to dwellings, allow extensions to the building, and to increase the total number of dwellings from 5 to 10.

However, the right was also updated to:

- No longer permit the creation of any dwelling with a floorspace over 150 square metres (previously, 'larger' dwellings could be up to 465 square metres)
- Remove the eligibility of any building that does not have suitable existing access to a public highway (previously, this was not an eligibility requirement)

Proposals that do not meet the above criteria are temporarily allowed to use the previous version of the permitted development right, though this will mean you are not able to benefit from any of the amendments made.

If you wish to use the previous version, please return to the 'Eligibility' question and select the option at the top of that question to do so. Otherwise you should continue through this application, which is based on the current legislation.

To be eligible for this permitted development right, the number and size of dwellinghouses developed has to be within the limits set by legislation. This includes any dwellinghouses that were previously developed under this permitted development right.

- No more than a total of 10 dwellinghouses can be developed;
- The floorspace of any single dwellinghouse developed cannot exceed 150 square metres;
- The cumulative floor space of all the dwellinghouses developed cannot exceed 1,000 square metres.

What will be the net increase in dwellinghouses?

1

NOTE: This figure should be the number of dwellinghouses proposed by the development that is additional to the number of dwellinghouses on the site immediately prior to the development.

Would the floorspace of any of the proposed dwellinghouses exceed 150 square metres?

- ☐ Yes
- ☒ No

Previous development

How many dwellinghouses have previously been created under this permitted development right on this established/former agricultural unit?

1

Cumulative floor space

What would be the total combined floor space (previously and in this proposal) changed to Dwellinghouses under this permitted development right on this established/former agricultural unit?

138

Square metres

Description of Proposed Works, Impacts and Risks

Please describe the proposed development, including the siting and location of the building(s)

The site of Five Oaks Barn is situated on land to the south of Pomper Lane, Hurstpierpoint, Hassocks BN6 9LJ (Lat: 50.955495 Long: -0.17143071). The barn is a traditional 'Dutch' barn with a 'D' shaped domed roof and steel frame construction.

The attached plans and elevation indicate the positioning and sizing of windows and doors in the structure in a way that there will be more than adequate natural light in all habitable rooms.

Will the building(s) be extended as part of the proposed development

- ☐ Yes
☒ No

NOTE: If using the transitional provision to benefit from the permitted development rights as they stood prior to 21 May 2024, then extensions are not permitted, and you should answer 'No'.

Are any associated building works or other operations required to make this change?

Note that such works are restricted to those listed below that are reasonably necessary to convert the building(s) for use as a dwellinghouse:

- the installation or replacement of windows, doors, roofs, or exterior walls;
- the installation or replacement of water, drainage, electricity, gas or other services;
- partial demolition to the extent reasonably necessary to carry out the works listed above.

- ☒ Yes
☐ No

If yes, please provide details of the design and external appearance of the building(s) in regard to these building works or other operations:

(Please see attached proposed plans and elevations to support the below response). Our proposal is to create a 2 bedroom dwelling of 84m² gross internal area. To facilitate change of use from agricultural to residential use the proposal is to utilise the existing primary and secondary steel framework with a replacement roof cladding supported on the existing frame. The existing profile 3 corrugated steel roof and wall claddings will be removed and a lighter weight Zinc or similar grey standing seam roof cladding will be installed along with matching colour eaves guttering and barge boards shaped into the curve of the roof. These types of standing seam roofing products are commonly utilised on this type of conversion and will provide a long lifespan with little or no discolouration with age. The existing exposed steel columns and trussing will be painted black. To create an enclosed 2 storey dwelling a new timber frame supporting structure will be erected within the shell of the existing steel frame supported by new strip foundations. The new structure elevations will be clad with vertical slatted composite cladding of 3 different colours to break up the consistency – Ecoscape 'Midnight', 'Silver Birch' and 'Golden Oak'. Grey aluminium or similar framed double-glazed windows and doors will be utilised to be in keeping with the agricultural history of the structure. Please see elevations as to number, placement and style of windows and doors. We have also provided examples of similar agricultural Dutch barns that have been converted into dwellings under Class Q at the end of this document

Please provide details of any transport and highways impacts and how these will be mitigated:

Good visibility access to the site is via an existing 12ft surfaced gateway shared with the adjacent dwelling. The planned development will not increase traffic movements to the site. It is estimated that there will be an average of 4 car movements per day. This is a reduction from the existing movements made by heavy farm machinery and tractors which can be in excess of 4 movements per day onto the adjoining Pomper Lane entrance. Traffic movements during the development operations will be similar to existing and will not require any heavy goods vehicle access onto Pomper Lane. Car parking will be allocated within the curtilage of the proposed new dwelling on an existing gravelled surface. This will not interfere with the continued agricultural operations of the holding.

Please provide details of any noise impacts and how these will be mitigated:

The development will be seen to reduce noise pollution on the surrounding area due to the reduction of agricultural machinery movements. There will be minimal noise pollution during development operations due to there being minimal external alterations. There are no noise pollution issues that will affect the end users of the barn. The owners of Penharbour House to the east of the site have expressed their support for this application and are pleased there will be a reduction in noise from the agricultural operations.

Please provide details of any contamination risks and how these will be mitigated:

There are no known contamination risks on the site. Due to the Organic status of the holding there has been no use of any agrichemicals and fertilisers in recent years. At no point since 1982 has there been any fuel storage at this property and there is no use of Asbestos on the property. Environmental Agency maps do not show any contamination risks within the immediate or further surroundings of the property. It can therefore be stated that there are no contamination risks that will affect the end users of the barn or those involved in the building operations required for conversion. The associated building operations will be conducted in such a way as to ensure that there are no contamination risks caused to the property.

Please provide details of any flooding risks and how these will be mitigated.

A flood risk assessment should accompany the application where the site:

- is in Flood Zones 2 or 3; or
- is in an area with critical drainage problems (such areas will have been notified to the Local Planning Authority by the Environment Agency).

[Check if your site location is in Flood Zone 2 or 3 online.](#)

Check with your Local Planning Authority to see if your site is in an area with critical drainage problems.

The property is not located in or near any Flood Zones 2 or 3 and therefore does not warrant a flood risk assessment. The property is located within Flood Zone 1 which states that there is less than a 0.1% chance of flooding occurring each year.

Declaration

I/We hereby apply for Prior Approval: Change of use - agricultural (or former agricultural) buildings to dwellinghouses as described in the questions answered, details provided, and the accompanying plans/drawings and additional information.

I/We confirm that, to the best of my/our knowledge, any facts stated are true and accurate and any opinions given are the genuine opinions of the person(s) giving them.

I/We also accept that, in accordance with the Planning Portal's terms and conditions:

- Once submitted, this information will be made available to the Local Planning Authority and, once validated by them, be published as part of a public register and on the authority's website;
- Our system will automatically generate and send you emails in regard to the submission of this application.

☒ I / We agree to the outlined declaration

Signed

John Houlton
