Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	Very much support as my garden is directly behind. During the autumn the volume of leaves filling the garden is overwhelming requiring weekly costly collecting. The debris that falls has caused damage to the seating area and gazebo at the end of the garden with the branches now overwhelming that space on my gardens side . Nothing can be grown in the shadow of the trees so very boggy the far end of the garden so increasing the light would be great . The lower branches are at fence height so taking these away would be appreciated. My son and I suffer from the pollen

from this tree terribly. The sticky sap and pollen covers everything in the garden and windows so any reduction in volume is very welcome. If I can assist by offering access to the tree from my side I am very happy to oblige.

Kind regards
