Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Mid Sussex District Council planning decisions with regard to potential ecological impacts from development.

Application: DM/26/1779
Location: Addaction 22 - 24 Sussex Road Haywards Heath West Sussex
Proposal: Change of use of existing building to children's day nursery together with operational works and landscaping to front elevation, single storey outbuilding to rear and use of rear yard for supervised children's play area

Thank you for consulting Place Services on the above application.

No ecological objection	☐
No ecological objection subject to attached conditions	☒

Subject to Natural England's formal comments on the conclusion of the LPA's Appropriate Assessment	☐

Summary

We have reviewed the Ecological Appraisal (Deepdene Ecology Ltd, July 2026) relating to the likely impacts of development on designated sites, protected and Priority species & habitats and identification of appropriate mitigation measures.

We are satisfied that there is sufficient ecological information available to support determination of this application.

This provides certainty for the LPA of the likely impacts on designated sites, protected and Priority species & habitats and, with appropriate mitigation measures secured, the development can be made acceptable.

The mitigation measures identified in the Ecological Appraisal (Deepdene Ecology Ltd, July 2026) should be secured by a condition of any consent and implemented in full. This is necessary to conserve and enhance protected and Priority species particularly those recorded in the locality. However, please note we have no comments on Great Crested Newt as we have been instructed by the LPA to leave this to the [NatureSpace Partnership](#).

This includes the recommendations for external lighting to ensure measures are sensitive to wildlife. This should be secured by a condition of any consent to avoid impacts to foraging and commuting bats and must follow the [Guidance Note 8 Bats and artificial lighting](#) (The Institute of Lighting Professionals & Bat Conservation Trust).

With regard to mandatory biodiversity net gains, it is highlighted that we have reviewed the submitted details provided for this application. Applications are required to deliver a mandatory 10% measurable biodiversity net gain, unless exempt under [paragraph 17 of Schedule 7A of the Town and Country Planning Act 1990](#) and the [Biodiversity Gain Requirements \(Exemptions\) Regulations 2024](#). Therefore, we are satisfied that sufficient information has been provided to demonstrate that the development meets the de-minimis exemption. As a result, we are satisfied that the development is exempt from the statutory requirement of mandatory biodiversity net gains.

We also support the proposed reasonable biodiversity enhancements for protected, Priority and threatened species, which have been recommended to secure net gains for biodiversity, as outlined under Paragraph 187d and 193d of the National Planning Policy Framework (December 2024). Reasonable biodiversity enhancement measures are a separate matter to mandatory biodiversity net gains and the finalised details should be outlined within a separate Biodiversity Enhancement Strategy to be secured as a condition of any consent.

This will enable LPA to demonstrate its compliance with its statutory duties including its biodiversity duty under s40 NERC Act 2006 (as amended) and delivery of mandatory Biodiversity Net Gain.

Impacts will be minimised such that the proposal is acceptable, subject to the conditions below based on BS42020:2013. We recommend that submission for approval and implementation of the details below should be a condition of any planning consent.

Recommended conditions

1. ACTION REQUIRED IN ACCORDANCE WITH ECOLOGICAL APPRAISAL RECOMMENDATIONS

“All mitigation measures and/or works shall be carried out in accordance with the details contained in Ecological Appraisal (Deepdene Ecology Ltd, July 2026) as already submitted with the planning application and agreed in principle with the local planning authority prior to determination.

This may include the appointment of an appropriately competent person e.g. an ecological clerk of works (ECoW) to provide on-site ecological expertise during construction. The appointed person shall undertake all activities, and works shall be carried out, in accordance with the approved details.”

Reason: To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

2. WITHIN THREE MONTHS OF CONSENT: BIODIVERSITY ENHANCEMENT STRATEGY

“Within three months of consent, a Biodiversity Enhancement Strategy for protected, Priority and threatened species, prepared by a suitably qualified ecologist in line with the recommendations of the Ecological Appraisal (Deepdene Ecology Ltd, July 2026), shall be submitted to and approved in writing by the local planning authority.

The content of the Biodiversity Enhancement Strategy shall include the following:

- a) Purpose and conservation objectives for the proposed enhancement measures;*
- b) detailed designs or product descriptions to achieve stated objectives;*
- c) locations of proposed enhancement measures by appropriate maps and plans (where relevant);*
- d) persons responsible for implementing the enhancement measures; and*

- e) *details of initial aftercare and long-term maintenance (where relevant).*

The works shall be implemented in accordance with the approved details shall be retained in that manner thereafter.”

Reason: To enhance protected, Priority and threatened species and allow the LPA to discharge its duties under paragraph 187d of NPPF 2024 and s40 of the NERC Act 2006 (as amended).

If external lighting is required:

3. **PRIOR TO BENEFICIAL USE: WILDLIFE SENSITIVE LIGHTING DESIGN SCHEME**

“Prior to beneficial use, a “lighting design strategy for biodiversity” in accordance with Guidance Note 08/23 (Institute of Lighting Professionals) shall be submitted to and approved in writing by the local planning authority. The strategy shall:

- a) identify those areas/features on site that are particularly sensitive for bats and that are likely to cause disturbance in or around their breeding sites and resting places or along important routes used to access key areas of their territory, for example, for foraging; and*
- b) show how and where external lighting will be installed (through provision of lighting layout plans, luminaire specifications, mounting heights, aiming angles, shielding measures, and lighting control strategies) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory or having access to their breeding sites and resting places.*

All external lighting shall be installed in accordance with the specifications and locations set out in the scheme and maintained thereafter in accordance with the scheme. Under no circumstances should any other external lighting be installed without prior consent from the local planning authority.”

Reason: To allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

Please do not hesitate to contact us if you have any queries in relation to this advice.
