Recommend refusal	☐
Subject to Natural England's formal comments on the conclusion of the LPA's Appropriate Assessment	☐

Summary

We have reviewed the decision notice for DM/22/1575 and the subsequent variation of conditions 2 and 11 through permission DM/23/3250. We note that the following conditions require submission of the specified documents and still require further information as stated in our response dated 5th June 2026:

- Condition 19: a Construction Environmental Management Plan (CEMP): Biodiversity.
- Condition 20: a Biodiversity Enhancement Strategy
- Condition 21: a Landscape and Ecological Management Plan (LEMP)
- Condition 24: Biodiversity Net Gain Design Stage report

Condition 19

We note that a Construction Environmental Management Plan (CEMP): Biodiversity has not yet been submitted and look forward to reviewing this document when it becomes available.

Condition 20

We have reviewed the Landscape and Ecological Management Plan Version 002 (Alyne Ecology, May 2026) which has been submitted in order to discharge Condition 20. We support the biodiversity enhancements within the Landscape and Ecological Management Plan Version 002 (Alyne Ecology, May 2026). However, a plan is required indicating the locations of the enhancements. Unfortunately, the plans in Section 9 are blurry with poor definition and cannot be read. We therefore recommend that these plans are re-submitted to the LPA and reviewed before discharge of condition.

Condition 21

We have reviewed the Landscape and Ecological Management Plan Version 002 (Alyne Ecology, May 2026) which has been submitted in order to discharge Condition 21. In general, we support the soft landscape plans from an ecological perspective. However, the plans in Section 9 are blurry with poor definition and cannot be read. We therefore recommend that these plans are re-submitted to the LPA and reviewed before discharge of condition.

Condition 24

We have reviewed the Biodiversity Net Gain (BNG) Assessment letter (Greenlink Ecology Ltd., December 2022) and the Biodiversity Statutory Metric pdf which have been submitted in order to discharge Condition 24. The condition requires the submission of a Biodiversity Net Gain Design Stage Report, which includes the baseline data and provision of the full BNG calculations, together with additional details on implementation and monitoring. The Biodiversity Net Gain (BNG) Assessment letter (Greenlink Ecology Ltd., December 2022) does not provide sufficient information and the Statutory Biodiversity Metric needs to be submitted as the original Excel spreadsheet, rather than as a pdf document.

We look forward to reviewing the BNG information when it becomes available.

Soft landscaping scheme:

We have reviewed the further revised Soft Landscape Plan and the Planting schedule for this application and indicate that we have no objection with the proposed landscaping scheme at an ecological perspective.

Please do not hesitate to contact us if you have any queries in relation to this advice.

Yours sincerely,

Hamish Jackson ACIEEM BSc (Hons)
