Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	I'm writing to confirm that we have no objections to the proposed loft extension and dormer. The dormer is clearly visible from our garden, but in our view it fits in well with the surrounding houses and existing rooflines. There are already three very similar flat-roof dormers visible from our garden, including our own, so we don't feel that this proposal would look out of place in the area. The materials also match the existing house and the surrounding properties. We understand that the existing roof tiles have been

reused for the dormer, which helps it blend in with the rest of the property rather than looking like a separate addition.

From what we can see from our garden, the current position of the dormer is relatively unobtrusive and sits naturally within the semi-detached roofline. In our opinion, it is a much more suitable position than putting the dormer on the other side of the house, which would be more prominent from the street.

We have had a very similar dormer extension carried out ourselves by the same company, so we are familiar with the design and how these extensions look once completed. Based on what we can see from our property, we are happy to support the application and have no concerns about the proposed dormer.

Kind regards
