Please identify the tree (s) and provide a full and clear specification of the works you want to carry out	Tree Reference: BH/01/TPO/69 Tree Label: T7 I am applying to fell this tree due to risk of topping due to bracket fungus. It is sounding quite hollow around the base and I am concerned about whether it is at risk of toppling. It has quite a lean to it and it is only approximately 6 metres away from the corner of my neighbours property. Luckily it's leaning away, but if it were to fall I would expect it would fall towards my own house, which is about 10-15 metres away, or into the road which has parked cars. Here are some photos for reference: * Photo of bracket fungus:  * Photo of tree from the other side of road with neighbours house to the right and my house to the left:
