Good evening

We wish to have our opposition recorded regarding the application for the proposed development via Woodlands Close or by any other other access. The proposed new road layout would be completely inappropriate, isolating one bungalow that would become a property on what potentially would be a 'roundabout' and causing huge distress to the other residents of Woodland Close.

Crawley Down has seen a massive amount of new developments over the past few years and having lived in the village for 35 years and, admittedly, having downsized to a new house in a small Close of just 9 houses, we are now living already in a small 'town' with no 'town' facilities, so to add this development, together with the Wates development off the Turners Hill Road is just too much for our 'village' infrastructure to cope with.

We have also seen a massive increase in local crime in the 'village', no doubt likely to the influx of people moving to the 'village'. We do not need any more.

PLEASE consider the residents of Crawley Down when making these building decisions, we cannot cope with anymore building here. The doctor's surgery is broken, the local school can't cope, we have no facilities to accommodate any more properties. We have all read about the promises the developers make, about schools, health centres, care homes, supplying funds for local amenities and IT NEVER HAPPENS.
