Subject: DM/25/2048 Lorimer House, Broad Street, Cuckfield

Hi Stefan

Brief comments on the above proposal, which sits alongside DM/25/2049. This proposal is for the installation of two gas meter boxes to the base of the front elevation of the property. Whilst this is a relatively minor work, it will introduce elements of clutter to the elevation, which would be better avoided if possible. Can the applicant therefore please provide the following further information:

- Why can't the boxes be retained in their current, internal position, at least that which relates to the business use (I am assuming one box is proposed to the retail use and one to the proposed new residential use at first floor?)
- If this is impossible, why can't they be located to the side of the building, at least in the case of the eastern box?
- Can the applicant please provide further details eg a manufacturer's spec. to show the appearance of the boxes.

Thanks,

Emily

Please note that this advice is given at Officer level only and is without prejudice to the formal decision of the District Council.
