Subject: Comment on planning application.

[REDACTED]
Planning application : DM/26/0073

Please note I cannot comment online the form keeps saying server error.

We strongly oppose this planning application because it fails to address critical issues regarding drainage, traffic volume and safety, local school and doctor capacity, and severe ecological harm to ancient woodland and the countryside.

Key Objections

- **Traffic and Safety:** Road congestion has worsened significantly over the past three years we've lived here, and the development will further endanger road safety and increase traffic volume.
- **Infrastructure Strain:** Local primary schools and doctor surgeries lack the capacity to support new residents.
- **Drainage Issues:** The plans still do not resolve serious concerns about local drainage capabilities.
- **Environmental Impact:** The destruction of ancient woodland will cause an irreversible loss of countryside and devastate local wildlife habitats [REDACTED]
