*We would like to comment on the referenced application as follows.*

*We are the owners of North Danworth Cottage.*

*We understand the requirement to extend the existing business park and we have no objection in principle.*

*Our concern however is with the proposed location. The existing view to the north of our property is to an open field, with an oak tree and beyond that Danworth Farmhouse, an attractive, Victorian, residential property. This outlook will be significantly impacted by the proposed location of the new barn and the associated car parking. Noise and light from the car park are a potential issue.*

*We would like to suggest that a better location for the new barn would be immediately to the north of the existing access road. This would appear to offer significantly less environmental impact.*

*Sincerely,*
