Subject: Application Ref - DM/25/2824 - Installation of a New Scissor Lift in Store Service Yard

[REDACTED]
Dear Planning Officer

I am writing to comment on planning application DM/25/2824 for the installation of a new scissor lift in the service yard at Sainsbury's, Haywards Heath.

I have concerns about noise disturbance, as the existing delivery bay already causes significant disruption to nearby residents. There are also ongoing issues with lorries parking outside the store which adds to noise and congestion in the area. To ensure this installation does not worsen these problems, I request the following conditions:

1. Noise Management Plan – including an acoustic assessment in line with the Council's Planning Noise Advice Document (Policy DPN7 Noise Impacts)
2. Confirmation of Operational Hours – to prevent early-morning or late-night disturbance
3. Monitoring of HGV Movements – to demonstrate that the lift achieves the intended reduction in traffic

Thank you for considering these points. I trust that the concerns of nearby residents will be taken into account when determining this application.

Kind regards
