Subject: St Stephen's Field development, Hamsland, Horsted Keynes

[REDACTED]

Dear Katherine,

We are writing to express our concern that MSDC's Planning Committee has approved the installation of street lighting along all the new roads on the above estate, which is currently under construction.

Horsted Keynes is in a Dark Skies area and the residents of the village wish it to remain so. This is why the HK Neighbourhood Plan expressly states that the Dark Skies must be preserved. External lighting is environmentally unfriendly and unnecessary.

I hope that the Planning Committee's decision to approve external lighting was an oversight rather than intentional decision to go against the wishes of villagers.

Please confirm back to us that external lighting will not be installed in any part of the St Stephen's Field development.

Yours sincerely,
