Disclaimer

This report has been prepared by A P Sherlock Associates Limited, with all reasonable skill, care and diligence within the terms of the Contract with the client, incorporation of our General Terms and Condition of Business and taking account of the resources devoted to us by agreement with the client.

We disclaim any responsibility to the client and others in respect of any matters outside the scope of the above.

This report is confidential to the client and we accept no responsibility of whatsoever nature to third parties to whom this report, or any part thereof, is made known. Any such party relies on the report at its own risk.

1. Statement

The proposal is based around the need to provide a new accessible toilet at the church. The Church has considered many possible options for the new toilet location and decided that the only feasible option is as follows:-

1. Construct a new accessible toilet using the existing rear fire escape lobby
This is within the existing building
2. Construct a new fire escape route utilising the existing rear glazed screens
3. Provide an external pathway connecting the new fire escape to the footpath at the south side of the church.

As the work is limited to an internal modification and the extension of a path we do not consider the proposal has any impact on sustainability.
