1. Planning Statement

This document has been prepared to describe the proposals to convert an existing corridor space into an accessible toilet and replace the existing fire exit which will be block with a new exit route.

Refer to ASA 001 General Arrangement Proposed and ASA 006 General Arrangement existing.

The proposal is based around the need to provide a new accessible toilet at the church. The Church has considered many possible options for the new toilet location and decided that the only feasible option is as follows:-

1. Construct a new accessible toilet using the existing rear fire escape lobby
2. Construct a new fire escape route utilising the existing rear glazed screens
3. Provide an external pathway connecting the new fire escape to the footpath at the south side of the church.

The new fire escape routes are shorter than the existing routes.

Emergency lighting is provided externally

A handrail has been provided as there is a 350mm step to the rear garden.
