Subject: DM/26/0982 | Proposed detached residential dwelling

Good afternoon Anna,

Planning reference: DM/26/0982 | Proposed detached residential dwelling

Thank you for consulting me on the above planning application. It is considered that the proposed development would present a low risk to great crested newts and/or their habitats. However, as the development is within the amber Impact Risk Zone, as modelled by district licence mapping, I recommend that the following informative should be attached to planning consent:

"The applicant is reminded that, under the Conservation of Habitats and Species Regulations 2017 (as amended) and the Wildlife and Countryside Act 1981 (as amended), it is an offence to (amongst other things): deliberately capture, disturb, injure, or kill great crested newts; damage or destroy a breeding or resting place; intentionally or recklessly obstruct access to a resting or sheltering place. Planning permission for a development does not provide a defence against prosecution under this legislation. Should great crested newts be found at any stage of the development works, then all works should cease, and a professional and/or suitably qualified and experienced ecologist (or Natural England) should be contacted for advice on any special precautions before continuing, including the need for a licence."

Additionally, all vegetation within the works area shall be maintained at a maximum height of 30mm until construction is completed through regular mowing or grazing in order to discourage great crested newts from using the site. All works shall be carried out in accordance with the following measures:

- Any demolition materials should be stored in skips or similar containers rather than in piles on ground
- Any trenches left overnight should be covered or provided with ramps to great crested newts from becoming trapped.
- Any building materials such as bricks, stone etc. should be stored on pallets to discourage great crested newts from using them as shelter.

If at any point during construction works any great crested newts are identified, then the following instructions must be strictly adhered to:

- Stop all works immediately and leave the area
- Inform an ecologist immediately who will provide further guidance / instructions

- Do not resume construction works until advised it is safe to do so by an ecologist

Best wishes,

Laura Downs (*she/her*)
