The Removal of Existing Roof Coverings and Replacement With New Matching Roof Coverings

Official list entry

Heritage Category: Listed Building

Grade: II*

List Entry Number: 1193325

Date first listed: 11-May-1983

List Entry Name: Wykehurst Park

Statutory Address 1: Wykehurst Park, London Road

National Grid Reference: TQ 25770 24405

2. New flats. Designed by E M Barry for Henry Huth, an Austrian banker. The Stables are dated 1869, but Pevsner dates the house at 1872-4. It is a large mansion in the style of a French chateau. Two storeys and attic. Ashlar. Tiled roof. The entrance front is asymmetrical. The main portion has a central porch with one window on each side on the ground floor and 3 windows over. This portion is flanked by round each with an arcaded top storey surmounted by a conical roof. To the left is a polygonal bay which lights the staircase and beyond this a square tower of 3 storeys, which is higher than the rest of the front. The garden front is symmetrical and the more impressive of the two. It has 8 windows. Eaves bracket cornice. Central projection with 3 round-headed arches on the ground floor and 3 windows above, flanked by circular bastions. Above is a large dormer window. At each end of the front is a large curved bay of 7 windows on ground and first floors with 3 large dormers projecting from the roof. The hall was originally hung with Spanish leather. The dining-room is wholly panelled in Elizabethan style. The drawing-room has a marble chimney piece of Adam character and originally walls panelled in brocade. The staircase is of Elizabethan design.

Building Setting and History

2.2

Historic Phases of Development

Information for Historic Environmental Records (HERs)

The original property, on the land, is believed to have burnt down in 1870.

1871-74 - Creation of the House

The house was constructed by William Cubitt, to designs by Prof. Edward Middleton 'E M' Barry (Royal Opera House, Bow St among eminent works).

Built for Henry Huth, a wealthy banker of German / Spanish descent, who was well-travelled and an 'ardent orientalist' speaking Persian, Arabic and Hindustani. Huth was a highly significant collector and reader of books (the collection is said to have sold, following his death, for £300k in 1910).

In a Pevsner co-authored book, the house was described as 'that epitome of high Victorian showiness and license'. The building was therefore very much of its time, with the trend of late 19th Century architecture toward a combination of revived historical styles and emerging trends. Wykehurst is at the forefront of the 'Franco's Premier' style (chateaus at Chambord and Chenonceau are a known influence).

Barry's architectural philosophy was that progress should be affected by developments of science and technology, while the artist should be able to draw upon the great storehouse of archaeology to provide the cultural overlay (owed to Pugin's 'True Principles').

Technologically, the building was innovative even ahead of its time, with cavity walls, fireproof iron / concrete floors, full hot water distribution and warm air circulation to principal receptions (concealed in deep internal cross walls).

The basement itself was a pragmatic addition, to cut into the slope of the land and preserve the upper floors from water ingress. These were areas barred for security and used by staff only. The kitchen was located at basement level, outside the footprint of the main building, to allow natural light, ventilation (keeping smells from the house) and ease of access for both

courtyard deliveries and back stair access to all levels.

Stylistically, the building and interiors were an outward expression of current architectural fashion (balancing Gothic and Classicist traditions) and the client's own tastes and influences.

The exterior was later marketed as 'a Victorian masterpiece in the combined styles of a German Schloss and Loire Chateau'.

The description of the principal interior rooms below confirms their broad characterisation as a mixture of revived historic styles from 16th, 18th and 19th centuries:

- Entrance Hallway – Elizabethan with Mediterranean influence (Spanish leather hanging, lost during the house's period of decay)
- Drawing Room – 'Louis XV' style (lost embroidered white satin wall coverings)
- Library – 'Adam' style (Robert Adam also being influenced by Louis XV)
- Dining Room – 'Elizabethan Italianate' style, including 16th century Italian wall panelling (significantly restored by Doyle – see below). Boiseries were also prevalent in French interiors from 17th and 18th centuries and becoming fashionable in this era.

By 1923, Edward Huth (who earlier inherited the property from his father) put it up for sale. It was sold in 1924 to Miss E T Grainger and Sister.

Two sets of sales particulars from the time are included in the appendices.

These documents, which include room dimensions and descriptions, have been used to determine the probable original layout of the upper floors. (see figure 2.01, 2.02 and 2.03 for floor plans)

1924 - Early 30's – Conversion to Hotel

Reference is made to ownership by Brighton hotelier Mrs F K Turner (in news of her passing).

By 1930 - 'The Wykehurst Park Hotel, which was lying dormant for many years, has awakened under its new and capable management'.

Notes: The extent of alterations made during this period are unclear with

few records having been discovered. Photographs show the building largely unchanged from the period as a single home.

WW2 – Wartime Occupation

The property was requisitioned (leased) by the Canadian army. First Canadian arrivals are recorded in 1940, with specific reference to Wykehurst from 1942.

The house was used as a marshalling location for D-Day and hosted up to 1500 troops in the buildings and land.

Post-war the building was vacant for 26 years (1945-71), with articles confirming looting, vandalism, weather ingress, internal vegetal growth and sheltering animals. From 1951 a news article records removal of large quantities of lead, by thieves.

By 1968, sales particulars describe the building as 'ripe for conversion to flats, school or a hotel'. By 1971, the building was reportedly considered 'beyond repair' and was scheduled for demolition.

Notes: The extent of alterations made during this period are unclear with only news clippings and war records having been discovered.

1971 – Asset Stripping and 'Restoration'

Antiques dealer, James 'Jimmy' Doyle gained a preservation order from demolition and then purchased the property in 1971.

The external wall and gates were listed at this time – LB/71/0001.

Doyle set about gaining planning consents for the estate and its buildings, then sold them off to fund the restoration. In 1972, consent was given for internal conversion to create 12 flats, with the main residence for the Doyle family and the remaining 11 flats seemingly sold off to generate further funds. A new entrance door, stair and lift were added at this time, to provide independent access to the 'private' flats, separated from the family's accommodation. (see figure 2.04, 2.05 and 2.06 for flat areas).

Additionally, the house and remaining grounds were opened for event use and as a filming location, to generate income. Stone eagle adornments to the listed gates are believed to be film set props added during this period.

2.0

Building Setting and History

Doyle's changes were not all to subsidise a period restoration, he gained consent to convert the Billiards Room with a storey high, sunken swimming pool with viewing windows at basement level. It is known that most of the original floors were rebuilt or restored due to water ingress while vacant, so this perhaps presented opportunity for new ideas, no matter their appropriateness!

Similarly, Doyle extended his new master bedroom onto the principal staircase, presumably to provide additional grandeur, losing the original first floor passageway in the process.

Other significant changes included the enlargement of the central light well at first floor, originally hosting the first-to-second floor staircase. The separation into flats made this stair redundant and unwelcome. The removal of the stair and enclosure enabled more light to enter the central lightwell, and host new access ways and gentries to the newly created flats. New windows were added to the courtyard to illuminate the reconfigured rooms adjacent.

New floors and roofs were added over the basement workshop and kitchen, to create new ground floor space. Existing windows were also infilled, which would otherwise have looked into this newly formed space. These works also made significant alteration to the former workshop and kitchen, which were stripped out and inter-linked.

By 1975, designs for 'restoration' of the principal reception rooms and fabric repairs by the Architecture and Planning Partnership received a heritage award. However, this restoration did not achieve the high standards of the original build, with evidence that budgets only allowed the application of a cosmetic veneer. Decorative techniques (colour matched paper) were used to mimic original stonework. The oak library shelves had been painted white, rather than restored.

It is also clear from written records and evidence on site, that much of the original decorative finish was removed or lost, seemingly due to the damage caused during the 26-year period of neglect. Today, wall chasing for electrical wiring is evident to the once richly decorated walls in the library and drawing room, from Doyle's refurbishment. Comparisons of photographs from the original property and during Doyle's ownership evidence the extent of alteration and loss of original features (see appendix).

On the upper floors, the refurbishment of flats introduces new, more standardised joinery profiles, particularly to doors, architraves and skirtings. Visual evidence shows that the profiles on second floor are deeper than the original, which were more modest, setting a visual hierarchy to the importance of such rooms.

By 1978, Doyle sold the property with areas of the build unfinished (The Billiards Room floor was still open, and the pool works abandoned part way through). By 1984, Doyle was made bankrupt.

1978 – To the Present Day

Doyle sold the main residence (the Doyle family 'flat') to Ebrahim Golestan, who owned the property to old age and its recent sale in late 2024. It is understood that since the initial purchase, Golestan slowly acquired the various flats to once again bring the property into one single ownership. However, the interior was not significantly altered to restore the grandeur of the original home. Small changes enacted, were driven by specific need or pragmatism, rather than being pieces of an over-arching new vision for the building.

The only other records available from this period are planning records and original architects drawings. The notable planning events being as follows:

1983 – BK/024/83 - Included unimplemented ideas to convert the basement into offices and with a maisonette organised over basement and ground floor, in the areas heavily altered by Doyle for his pool 'complex'. New windows were added, and with some openings either infilled or opened throughout the property (refer to plan mark-ups).

First Listing of the house itself was on 11th May 1983, as LB/83/0372.

1985 – BK/024/84 LB – Repair work to overcome damage caused by water penetration and dry rot. Plus, alteration of existing window opening to form new stone mullioned window with casement lights. Seemingly the restoration by Doyle had either been incomplete or poorly undertaken. The plans show extensive floor restoration at ground floor and water proofing works to the basement generally.

1990 – BK/00790/LB – 'glazing over internal courtyard', previously opened by Doyle.

2024 – New Ownership

Property purchased by M. Blencowe with the intention of restoration as a single family home.

At the time of the purchase the property was once more in need of urgent repair. The now elderly residents had not kept up with required maintenance work or had been badly treated by unscrupulous trades people taking advantage of a perceived 'opportunity'.

The property was left with many failings, a series of applications are now being sought for proposed alterations and repairs to return the property to a single family home.

4.3

Recording Proposals

Creating and maintaining accessible records of all works carried out to a building or place is an important aspect of conservation practice. Record keeping can be considered in two parts – (1) documentation of repairs or other works carried out to a building or place, including drawings, schedules of work, specifications and digital data, and (2) archaeological recording prior to and during the works.

This Heritage Impact Assessment is written for the purposes of planning consent. However, it will form an important record of initial information discovery and is considered a starting point for the recording and generating of an accessible archive for future building activities.

Record keeping is also a requirement of the National Planning Policy Framework:

Local planning authorities should require developers to record and advance understanding of the significance of any heritage assets to be lost (wholly or in part) in a manner proportionate to their importance and the impact, and to make this evidence (and any archive generated) publicly accessible 76. However, the ability to record evidence of our past should not be a factor in deciding whether such loss should be permitted.

The RIBA 'Conservation Guide' (2024) dedicates a whole chapter (11) to record-keeping, with guidance and best practice examples of methodologies.

Appendix II

Planning Policy & Guidance

Planning (Listed Buildings and Conservation Areas) Act 1990

The Act is legislative basis for decision making on applications that relate to the historic environment.

Sections 16, 66 and 72(l) of the Act impose a statutory duty upon local planning authorities to consider the impact of proposals upon listed buildings and conservation areas.

Section 16 of the Planning (Listed Buildings and Conservation Areas) Act 1990 states that:

[...] in considering whether to grant listed building consent for any works the local planning authority or the Secretary of State shall have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses.

Similarly, section 66 of the above Act states that:

In considering whether to grant permission for development which affects a listed building or its setting, the local planning authority, or as the case may be the Secretary of State shall have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses.

Similarly, section 72(l) of the above Act states that:

[...] with respect to any buildings or other land in a conservation area, special attention shall be paid to the desirability of preserving or enhancing the character or appearance of a conservation area.

Local Planning Policy and Guidance

Mid Sussex District Plan 2014-2031, Policy DP34: Listed Buildings and Other Heritage Assets

Strategic Objectives: 2) To promote well located and designed development that reflects the District's distinctive towns and villages, retains their separate identity and character and prevents coalescence; 4) To protect valued characteristics of the built environment for their historical and visual qualities; and 11) To support and enhance the attractiveness of Mid Sussex as a visitor

destination.

Evidence Base: West Sussex Historic Environment Record; Register of Listed Buildings.

LISTED BUILDINGS

Development will be required to protect listed buildings and their settings. This will be achieved by ensuring that:

- A thorough understanding of the significance of the listed building and its setting has been demonstrated. This will be proportionate to the importance of the building and potential impact of the proposal;
- Alterations or extensions to a listed building respect its historic form, scale, setting, significance and fabric. Proposals for the conversion or change of use of a listed building retain its significance and character whilst ensuring that the building remains in a viable use;
- Traditional building materials and construction techniques are normally used. The installation of uPVC windows and doors will not be acceptable;
- Satellite antennae, solar panels or other renewable energy installations are not sited in a prominent location, and where possible within the curtilage rather than on the building itself;
- Special regard is given to protecting the setting of a listed building;
- Where the historic fabric of a building may be affected by alterations or other proposals, the applicant is expected to fund the recording or exploratory opening up of historic fabric.

National Planning Policy Framework

The NPPF (December 2024, amended February 2025) sets out the government's planning policies for England, with a strong emphasis on sustainable development and the historic environment. The following paragraphs are most relevant:

- Paragraph 202: Requires great weight to be given to the conservation of designated heritage assets, especially those of the highest significance (which includes Grade II* buildings).
- Paragraph 213: Any harm (even less than substantial) must be clearly justified.
- Paragraph 215: Where less than substantial harm is identified, it must be weighed against public benefits.

- Paragraph 219: Encourages proposals that "enhance or better reveal the significance" of heritage assets.

Historic England Advice Notes (HEANs)

Historic England provides non-statutory but authoritative guidance on managing change to heritage assets. The following notes are particularly applicable:

HEAN 2: Making Changes to Heritage Assets

- Advocates a proportionate approach based on understanding significance.
- Recommends reversibility and minimal intervention where possible.
- Supports the use of historically appropriate detailing in alterations.

HEAN 12: Historic Environment and Site Allocations in Local Plans

- Emphasises sensitive design that respects the setting and scale of historic places.
- Promotes adaptive reuse of historic buildings in ways that support their long-term conservation.

Appendix III

ICOMOS Guidelines

Understanding Significance

- A. Read a monument, ensemble or site to identify its emotional, cultural and use significance.

History and Identity

- B. Understand the history and technology of monuments, ensembles or sites in order to define their industry, plan for their conservation, and interpret the results of this research.

Setting and Context

- C. Understand the setting of a monument, ensemble or site, their contents and surroundings, in relation to other buildings, gardens or landscapes.

Carrying out Research

- D. Find and absorb all available sources of information relevant to the monument, ensemble or site being studied.

Analysing Building Behaviour and Diagnosing Defects

- E. Understand and analyse the behaviour of monuments, ensembles and site as complex systems.
- F. Diagnose intrinsic causes of decay as a basis for appropriate action.

Report Writing

- G. Inspect and make reports intelligible to non-specialist readers of monuments, ensembles and sites, illustrated by graphic means such as sketches and photographs.

Charters and Regulations

- H. Know, understand and apply UNESCO conventions and recommendations, ICOMOS and other recognised Charters, regulations and guidance
(note: UNESCO is the United Nations Educational, Scientific and Cultural Organization, covering globally significant heritage sites).

Making Balanced Judgements

- I. Make balanced judgements based on shared ethical principles and accept responsibility for the long-term welfare of cultural heritage.

Obtaining Expert Advice

- J. Recognise when advice must be sought and define the areas of need of study by different specialists, e.g. wall paintings, sculpture and objects of artistic and historical value, and/or studies of materials and systems.

Repair and Maintenance

- K. Give expert advice on maintenance strategies, management policies and the policy framework for environmental protection and preservation of monuments and their contents, and sites.

Record Keeping

- L. Document works executed and make same accessible.

Constructive Collaboration

- M. Work in multi-disciplinary groups using sound methods.
- N. Be able to work with inhabitants, administrators and planners to resolve conflicts and to develop conservation strategies appropriate to local needs, abilities and resources.

Additional guidance on climate change impacts

The RIBA suggests the following guideline, in their 'Conservation Guide' published 2024:

Explore appropriate ways to reduce a building's carbon footprint, based on a full understanding of the building's significance, its fabric and performance, including its physical and cultural context.
