

SK TRANSPORT PLANNING

TRAFFIC TRANSPORT HIGHWAYS

TRANSPORT STATEMENT

Date: 4th April 2025

Project: Proposed 26 Residential Unit Development on Land Adjacent Either Side of Batchelors Farm, Keymer Road, Burgess Hill

1. INTRODUCTION

- 1.1 This Transport Statement (TS) has been prepared to consider traffic and transport matters relating to the proposed development of 26 residential dwellings on land adjacent either side of Batchelors Farm, to the west of Keymer Road, Burgess Hill. The planning application boundary is shown in **appendix a** and the site is being promoted by SDP (the client).
- 1.2 The illustrative layout for the residential scheme is shown in **appendix b**, which shows the pedestrian and vehicular access delivered onto Keymer Road. This access strategy has previously been considered and approved by Mid Sussex District Council (MSDC) and West Sussex County Council (WSCC) in 2015 as part of the access strategy for a two residential development scheme. Further commentary on the previously approved access arrangements is provided later in this document.
- 1.3 To undertake a thorough assessment of traffic and transport matters associated with the proposed development a number of site visits have been undertaken, to assist in shaping the previously approved vehicular access strategy to the site, as well as considering accessibility by sustainable modes of travel, such as walking, cycling and by public transport.
- 1.4 This TS provides a review of:
 - the application site location
 - existing traffic and transport conditions in the vicinity of the site
 - relevant national and local policy guidance pertaining to the development proposals
 - its compliance (in accessibility terms) with industry standard walk and cycle distances to local facilities
 - the ability to deliver an appropriate pedestrian, cycle and vehicular access to serve the development
 - any other traffic and transport matters relevant to the development proposals
- 1.5 The findings from this TS confirm that the development proposals will not have a material impact (in traffic and transport terms) on the surrounding highway network and the use of a previously agreed and consented access strategy to the site remains appropriate for the scale of development proposed.
- 1.6 The site continues to be sustainably located on the edge of an existing urban area for end occupiers to travel sustainably to a range of local facilities. The development impact will not be “severe”, the test taken from the National Planning Policy Framework.

2. SITE LOCATION & EXISTING HIGHWAY CONDITIONS

- 2.1 The application site is located immediately to the west of Keymer Road, a route that forms part of the publicly adopted highway that routes north/south from the centre of Burgess Hill southwards towards Hassocks.
- 2.2 Keymer Road is subject to a 30mph speed limit from a point immediately south of the simple priority junction with Greenlands Drive northwards towards the town centre. To the south the speed limit changes to 40mph. Note that historically this section of Keymer Road was subject to the national speed limit.

- 2.3 From the junction of Keymer Road and Broadlands, immediately opposite the development site a footway is in place on the eastern side of the carriageway. This footway routes northwards towards the town centre, providing a continuous route for pedestrians from this established residential area.
- 2.4 The site benefits from direct frontage onto Keymer Road along its eastern boundary. The wider site, which incorporates Batchelors Farm already has two established pedestrian and vehicular access points onto the adjacent public highway. The vehicular access to the farm already provides unrestricted access onto the public highway, and at the southern boundary to the site an additional gated vehicular access further south provides access to a number of storage buildings.
- 2.5 The section of Keymer Road fronting the application site is not subject to any parking or waiting restrictions, and with a carriageway width of 5.5m this route is wide enough for two private cars to pass. Manual for Streets confirms that a carriageway width of 5.5m is wide enough to accommodate two service vehicles to pass without conflict.
- 2.6 Travelling north Keymer Road maintains a carriageway width of circa 5.5m before joining Folders Lane at a mini-roundabout junction. Residential properties have direct pedestrian and vehicular access onto this route, and due to the width of this section of Keymer Road motorists can park on both sides of the carriageway should they wish to do so. A recent site visit has confirmed there is evidence of other residential development on this corridor, most notably the Charles Church development at Willowhurst.
- 2.7 Keymer Road provides direct frontage access to a number of residential properties on both sides of the carriageway. The principle of direct frontage access is therefore established along this corridor.
- 2.8 To consider the appropriateness of Keymer Road as a route which would provide pedestrian, cycle and vehicular access to the development proposals a review of existing traffic volumes, speeds and personal injury collision data has been collated.
- 2.9 This information has been previously presented and accepted by WSCC through a number of planning applications for residential development on the wider Batchelors Farm site, and of course the 2015 planning approval. For ease of reference this data is presented again in this document.

Traffic Volumes and 85th Percentile Vehicle Speeds

- 2.10 Previous technical assessment work presented and agreed with WSCC has considered traffic volumes and the speed of traffic on Keymer Road. A seven-day Automatic Traffic Counter (ATC) was placed on the corridor in 2018, before COVID and was located to the south of the proposed vehicular access to the development. This was at the point where the national speed limit extended to at the time.
- 2.11 A summary of the directional traffic flows and 85th percentile vehicle speeds are provided in **table 2.1**, with the full survey data provided in **appendix c**.

Direction/Time Period	Keymer Road (Northbound)	Keymer Road (Southbound)	Total
AM Peak (0800-0900) Traffic Flow (PCUs)	322 (46%)	374 (54%)	696
PM Peak (1700-1800) Traffic Flow (PCUs)	290 (42%)	397 (58%)	687
Average Vehicle Speeds	36.8 mph	36.6 mph	
85 th Percentile Vehicle Speeds	43.0 mph	42.8 mph	

Table 2.1: 2018 Traffic Survey - Keymer Road Traffic Flow and 85th Percentile Vehicle Speeds

- 2.12 **Table 2.1** confirms that in pre-COVID times in both the AM and PM peak periods Keymer Road accommodated an average of 696 and 687 vehicles for each respective peak period. This equates to circa 11.5 vehicle movements a minute when averaged over the busiest 60-minute period time periods.
- 2.13 To validate the 2018 survey data an additional survey has been undertaken in March/April 2025. A summary of this latest survey data, which also captures directional traffic flows and 85th percentile vehicle speeds is provided in **table 2.2**. This survey data provided in **appendix d**.

Direction/Time Period	Keymer Road (Northbound)	Keymer Road (Southbound)	Total
AM Peak (0800-0900) Traffic Flow (PCUs)	289 (47%)	330 (53%)	619
PM Peak (1700-1800) Traffic Flow (PCUs)	284 (47%)	323 (53%)	607
Average Vehicle Speeds	37.5 mph	36.5 mph	
85 th Percentile Vehicle Speeds	44.4 mph	43.0 mph	

Table 2.2: 2025 Traffic Survey - Keymer Road Traffic Flow and 85th Percentile Vehicle Speeds

- 2.14 Both traffic surveys confirm that this section of the adopted highway is well used by motorists in both peak periods, although the 2025 survey data confirms that there has been a reduction in the overall number of vehicle movements in both peak periods (-77 PCUs in the AM peak and -80 PCUs in the PM peak).
- 2.15 With regard to vehicle speeds on Keymer Road it is noted that the 2018 85th percentile vehicle speeds over the seven-day survey period were 43.0 mph and 42.8 mph in the northbound and southbound directions respectively.
- 2.16 **Table 2.1** also confirmed that in 2018 the average vehicle speeds on this corridor were 36.8mph and 36.6mph in the northbound and southbound directions respectively. These 85th percentile and average speeds were recorded when the national speed limit was in place on this section of Keymer Road.
- 2.17 The 2025 85th percentile and average speed data is directly comparable to the 2018 data. **Table 2.2** confirms that the 85th percentile speeds have only changed by +1.4mph in the northbound direction and +0.2mph in the southbound traffic direction. With regard to average speeds in the northbound direction there was a -0.7mph change and in the southbound direction +0.1mph change.
- 2.18 The variance between the 2018 and 2025 traffic and speed survey data is not considered to be material or significant, and confirms that traffic conditions on Keymer Road have not materially changed on this section of the adopted highway.
- 2.19 Based on the findings from the site visits and the 2018 and 2025 traffic and speed surveys presented in this TS, and both Mid Sussex District Council (MSDC) and WSCC previously approving residential development with a vehicular access in an identical position (planning consent DM/15/3955), the principle of an acceptable vehicular access in this location has been established.
- 2.20 These access works have already been part-implemented as part of this historic planning approval.
- 2.21 The site visits and access reviews have also confirmed that the principle of a direct residential vehicular access onto Keymer Road is entirely compatible with the existing fabric of development along this route. The simple priority junction access arrangement effectively replicates the existing residential vehicular accesses at Greenlands Drive, Keymer Gardens and Willowhurst onto Keymer Road.
- 2.22 The next section of this report considers the most recent Personal Injury Collision (PIC) data for Keymer Road, close to the application site.

Personal Injury Collision Data

- 2.23 A review of the Crashmap database has been undertaken in the vicinity of the site, to ascertain whether there are any historic patterns that might affect the use of the previously consented and implemented access arrangements to the application site. An extract from the Crashmap website is provided below, showing the Personal Injury Collision (PIC) data for the years 2017 to 2021 inclusive.

Figure 2.1: Extract from Crashmap Website for Keymer Road (2019 to 2023 PIC Data)

- 2.24 The PIC extract shown in **figure 2.1** confirms that there has been a single collision circa within 500m of the previously approved development site access points. This collision is summarised in **table 2.2**. The full collision report is provided in **appendix e**.

Collision Reference	Date and Time	Collision Severity	Weather and Road Conditions	Description
2021471075620	10/8/21 @ 1712	Serious	Fine without high winds Dry road surface	V1 (private car) and V2 (private car) collide whilst proceeding normally along the carriageway

Table 2.2: 2017 to 2021 Keymer Road Personal Injury Collision Review

- 2.25 Whilst all collisions are regrettable the review of the PIC collision data on the surrounding highway network confirms there is no pattern or causation of collisions in the vicinity of the site.
- 2.26 Accordingly the inclusion of modest levels of development traffic is not expected to exacerbate highway safety or traffic flow on this section of adopted highway, in a location where WSCC (as highway authority) has previously granted planning permission for a vehicular access, and also allowed the formation of new vehicular access points onto this corridor.
- 2.27 Based on the above review the access arrangements to the proposed development will not have a 'severe' impact, the test taken from the NPPF.
- 2.28 The site visits have also confirmed that the principle of residential development delivering a new vehicular access onto Keymer Road has been established as part of historic residential developments to the north of the application site at Greenlands Drive, Keymer Gardens and

Willowhurst.

- 2.29 These residential streets are accessed via priority junctions onto Keymer Road, with appropriate visibility splays to allow motorists safe egress from the site. The access to the proposed development assessed in this TS shows the previously agreed 2.4m x 120m visibility splay to the north and a 2.4m x 150m visibility splay to the south. In doing so the visibility splays replicate those agreed by WSCC as part of the DM/15/3955 planning approval.
- 2.30 Based on the established residential developments to the north taking access from Keymer Road, as well as the consented and part-implemented residential planning approval on the site, the principle of the proposed 26 residential unit development taking access via simple priority junctions onto this public highway at this location has already been established.
- 2.31 Therefore there are no technical reasons why WSCC, as highway authority would not accept the access arrangements presented in this application, as they replicate what the highway authority has previously approved, and have been part-implemented.

3. SUSTAINABLE DEVELOPMENT

- 3.1 The proposed development site is located on the southern edge of Burgess Hill, and as such is well located for access on foot and by cycle to the town's local facilities. With two-thirds of all journeys in the UK being under five miles it is the shorter distance trips where the biggest opportunities exist for people to make sustainable travel choices and to make a real difference to their environment.
- 3.2 The DfT document 'Creating Growth, Cutting Carbon', states that walking offers the greatest potential for replacing short car trips, particularly for journeys under 2km. The IHT document, 'Guidelines for Providing for Journeys on Foot' and DfT documents 'Creating Growth, Cutting Carbon' and 'PPG13 – Best Practice Guidance', provides further details of accepted walking distances.
- 3.3 With regard to cycling DfT guidance states that cycling has the potential to substitute for short car trips up to 5km in length. This represents a journey time of 25 minutes based on a slow cycle speed of 200m/s, or 15-minute journey time based on a leisurely, average cycle speed of 333m/s.
- 3.4 A summary of local facilities within appropriate walking and cycling distances is provided in **table 3.1** and shown on **plans 2 and 3**.

Batchelors Farm Amenities/ Services	Location/ Address	From North Eastern Access (km)	Walk Time from North Eastern Access (mins)
Recreation & Leisure Facilities			
Southway Recreation Ground	Off Southway, RH15 9SU	3.38	42.3
The Triangle Leisure Centre & Pool	Triangle Way, RH15 9SL	3.86	48.25
The Woolpack Public House	Howard Avenue, RH15 8NN	3.37	42.1
The Cricketers Public House	23 West Street, RH15 8NY	2.74	34.3
Children's Play & Recreation Ground	Off Downs Road, RH15	2.89	36.1
St John's Park	Burgess Hill, RH15 9AA	2.25	28.1
Burgess Hill Cricket Club	The Pavilion, St John's Park RH15 9AA	2.09	26.1
Tennis Courts	St. John's Park, Off Park Road, RH15	2.26	28.3
St. Andrew's Cricket Ground	Leylands Road, RH15	2.54	31.8

The Brewers Arms Public House	25 London Road, RH15 9QU	2.07	25.9
The Orion Cinema	Cyprus Road, RH15 8DX	1.61	20.1

ATM	BP Garage, London Road, RH15 9RD	2.24	28.0
Public Transport			
Nearest Bus Stop	Burgess Hill, adj. Greenlands Drive	0.16	2.0

Table 3.1: Local Facilities within the Town (Walk Distances and Times)

- 3.5 As shown in **table 3.1** there are a range of facilities within accepted walking and cycling travel distances that end occupiers of the proposed development could access without reliance on the private car.
- 3.6 Turning to access by public transport the IHT document 'Planning for Public Transport in Development' states that 400m is the desirable maximum walking distance to local bus services, equating to a walking time of 5 minutes.
- 3.7 **Plan 2** shows the location of the nearest bus stop on Keymer Road, adjacent to Greenlands Drive. This stop is 160m north of the site. A summary of the local bus service to the aforementioned stop is provided in **table 3.2** with the timetable provided in **appendix f**.

Service	Route	First Weekday Bus	Average Weekday Daytime Frequency	Last Weekday Bus
33	Hurstpierpoint – Hassocks – Keymer Road – Burgess Hill – Haywards Heath	0702	60-minute Headway	1808
	Haywards Heath – Burgess Hill – Keymer Road – Hassocks – Hurstpierpoint	0923		1823

Table 3.2: 2025 Local Bus Service Provision

- 3.8 **Table 3.2** confirms that there is an existing bus service that route past the application site. The service operates on an hourly frequency, and routes to/from Burgess Hill, Hurstpierpoint and Haywards Heath. This bus service provides a travel alternative for those living near the site, and will give end occupiers of the proposed development opportunity to travel by bus should they choose to do so.
- 3.9 In addition to this service there is an additional regular bus service operated by Compass Travel routing via a bus stop circa 550m north of the application site. Whilst outside of the desirable 400m walk distance this additional service is only an additional circa two-minute walk from the site, and offers end occupiers an additional range of bus services to travel to/ from the site.
- 3.10 A summary of this regular bus service is provided in **table 3.3** with the timetable provided in **appendix g**.

Service	Route	First Weekday Bus	Average Weekday Daytime Frequency	Last Weekday Bus
35C (Town Circle)	Church Road – Ferndale Road – St Andrews Road – Worlds End – Bramber Way – Denham Road – Church Road	0657	Circa 60 min Headway	1817

Table 3.2: 35C Burgess Hill Town Circular Local Bus Service

- 3.11 This review confirms that there are additional local bus services routing close to the site that will offer end occupiers of the proposed development an alternative to the private car.
- 3.12 With regard to rail services whilst the nearest rail station is at Burgess Hill, circa 1.2km from the development site. This station is well within accepted walking and cycle distances and offers end occupiers of the proposed development a real and attractive travel mode for longer distance trips to leisure and employment destinations such as Brighton, Gatwick, Croydon, Clapham Junction and Central London.
- 3.13 A summary of rail services is provided in **table 3.4** with the full timetable provided in **appendix h**.

Rail Station	Service Destination	First Weekday Service	Average Weekday Daytime Frequency	Last Weekday Service	Route
Burgess Hill	Brighton	0556	c. 2 trains per hour	0110	Burgess Hill – Hassocks – Preston Park - Brighton
	St Pancras International	0522	2 trains per hour	2337	Burgess Hill – Wivelsfield – Haywards Heath – Three Bridges – Gatwick Airport – East Croydon – London Blackfriars – City Thameslink – Farringdon – London St Pancras – West Hampstead Thameslink – St Albans City – Harpenden – Luton Airport Parkway – Luton - Bedford
	London Victoria	0533	c. 2 trains per hour	2325	Burgess Hill – Haywards Heath – Gatwick Airport – East Croydon – Clapham Junction – London Victoria

Table 3.4: 2025 Local Rail Services

- 3.14 Based on this review the application site is shown to be in a sustainable location, located on the edge of an existing settlement and within walking and cycling distances of a range of local facilities and existing public transport services. This review tallies with both WSCC's previous positive comments on the residential development proposals (provided in **appendix i**) relating to the 2015 planning approval, and other recently consented residential schemes, including the Willowhurst development.
- 3.15 Bearing in mind the findings from this review and also the previous consented residential development on the site, the residential development proposals are shown to be in line with the requirements of the National Planning Policy Framework (NPPF).

4. DEVELOPMENT PROPOSALS & ACCESS STRATEGY

- 4.1 The development proposals are for 26 new residential dwellings on land to the west of Keymer Road, as shown in **appendix b**. The development will be accessed from the part-implemented

vehicular accesses onto Keymer Road consented as part of the 2015 planning approval.

- 4.2 New pedestrian access routes from the development to connect into the footway on the eastern side of Keymer Road will also be provided on the northern side of the northern development access.
- 4.3 As confirmed earlier in this report Keymer Road forms part of the adopted highway, and benefits from a continuous footway on the eastern side of the carriageway northwards towards Burgess Hill town centre. This footway provides pedestrian access to the existing residential properties in the local area.
- 4.4 With regard to vehicular accesses to the development two access points are shown from the western side of Keymer Road, and have been designed to incorporate:
 - A 6m wide vehicular access
 - A 2m footway on the northern side of the access to connect into the existing footway on the eastern side of Keymer Road
 - visibility splays that accord with the previously consented residential scheme on the site (planning application DM/15/3955) which provides 2.4m x 120m visibility splays to the north and a 2.4m x 150m splay to the south
- 4.5 The previously consented residential development access strategy drawing is provided in **appendix j**, and the previously agreed visibility splays have been transposed onto the development site accesses. These accesses are positioned in the identical locations to the 2015 consented access location. The visibility splays can be delivered across land either controlled by the applicant or the publicly adopted highway.
- 4.6 Pedestrian access from the development is shown by providing a new footway on the northern side of the northern development access. A pedestrian link is provided from this point into the site, to connect with the shared surface that links with the southern access point.
- 4.7 Pram crossings and tactile paving will be provided on either side of Keymer Road to allow the footway on the eastern side of Keymer Road to connect into the development on the western side of the carriageway. This improved crossing point will also benefit pedestrians using the adjacent public footpath, immediately to the north of the development site.
- 4.8 With the access strategy replicating the previously agreed access arrangements from the 2015 planning approval (MSDC planning reference DM/15/3955) all technical matters have been agreed by WSCC, as set out in their formal response on the 2015 application, presented in **appendix i**.

Impact Assessment

- 4.9 The TRICS database has previously been interrogated to source vehicle trips associated with residential development proposals at the wider Batchelors Farm site. The TRICS output for this previously collated data is provided in **appendix k**.
- 4.10 **Table 4.1** provides a summary of vehicle trips from the proposed 26 residential unit development.

Vehicle Trip Rate (per unit)	In	Out	Total	In	Out	Total
AM Peak (0800-0900)	0.194	0.413	0.607	5	11	16
PM Peak (1700-1800)	0.423	0.161	0.584	11	4	15

Table 4.1: 26 Residential Unit Development Trip Rates

- 4.11 **Table 4.1** confirms that the proposed 26 residential unit scheme is predicted to generate 16 and 15 vehicle movements in the AM and PM peak periods respectively. This limited level of additional

traffic generated by the proposed development will have no material impact on traffic flow, or cause congestion or delay on Keymer Road, or other local routes.

- 4.12 With the most recent 2025 traffic surveys confirming this corridor accommodates in excess of c.600 PCUs in the morning and evening peak periods, the additional traffic generated by the proposed development will be discernible to other users of this highway.
- 4.13 It is also noted that these estimated traffic movements are directly comparable to the residential scheme submitted to MSDC in 2019 by the same applicant as part of planning application DM/19/3334. WSCC Highway Officers confirmed in their formal responses to this application that the traffic generated from a 33 residential unit scheme would be:

‘...unlikely to cause safety or capacity issues on local roads’.
- 4.14 The same positive response will also apply to this 26 residential unit scheme on the same development site.
- 4.15 Based on the findings in this TS the use of the existing consented and part-implemented vehicular access strategy from the site onto Keymer Road is seen as a logical and sensible access strategy for this 26-residential unit proposal.
- 4.16 The access proposals for pedestrian and vehicular movements have been shown to be appropriate and deliverable for the scale of development proposed. All visibility splay requirements at this previously consented access point onto Keymer Road can be delivered within land the applicant controls or the public highway.

5. CONCLUSIONS

- 5.1 This Transport Statement has been prepared to consider traffic and transport matters relating to the proposed development of 26 residential dwellings on land adjacent either side of Batchelors Farm, Keymer Road, Burgess Hill.
- 5.2 This technical document confirms that the development site is sustainably located, being located on the southern edge of the town and with appropriate walking and cycling distances to a range of local facilities.
- 5.3 The site is also located close to existing bus routes. Burgess Hill rail station is 1.2km away and this rail is within accepted walk and cycle distance from the development site for end occupiers to make longer distance employment and leisure trips towards Brighton, Gatwick, Croydon and central London.
- 5.4 With respect to vehicular access to the development the development will be served by the previously approved accesses onto Keymer Road. These access arrangements have been previously designed to provide appropriate visibility splays. The southern access has been designed to accommodate all service and refuse vehicle traffic. The two access point visibility splays have been previously agreed with WSCC, and are shown as 2.4m x 120m to the north of the access and 2.4m x 150m to the south.
- 5.5 An assessment has been made of existing traffic conditions (both in terms of vehicle speeds and traffic volume) on Keymer Road. The two sets of traffic surveys confirm that motorists average and 85th percentile speeds have not materially changed between the 2018 and 2025 survey dates.
- 5.6 The latest traffic survey has confirmed that traffic flows in the AM and PM peak periods have actually reduced since the 2018 surveys. Directional average and 85th percentile speeds over the seven day survey period have remained similar between the 2018 and 2025 surveys.
- 5.7 The TRICS assessment confirms that the 26-residential unit development will generate 16 and 15 additional vehicle movements in the AM and PM peak respectively. This modest increase in traffic will be well within the day-to-day variation of flow on the corridor, and will have no discernible effect on the traffic flow, congestion or delay in the local area.
- 5.8 This increase in vehicular movements is also directly comparable to those traffic movements

previously accepted by WSCC as part of planning application DM/19/3334. WSCC confirmed in their formal responses to this application that the traffic generated from a 33 residential unit scheme would be:

‘...unlikely to cause safety or capacity issues on local roads’.

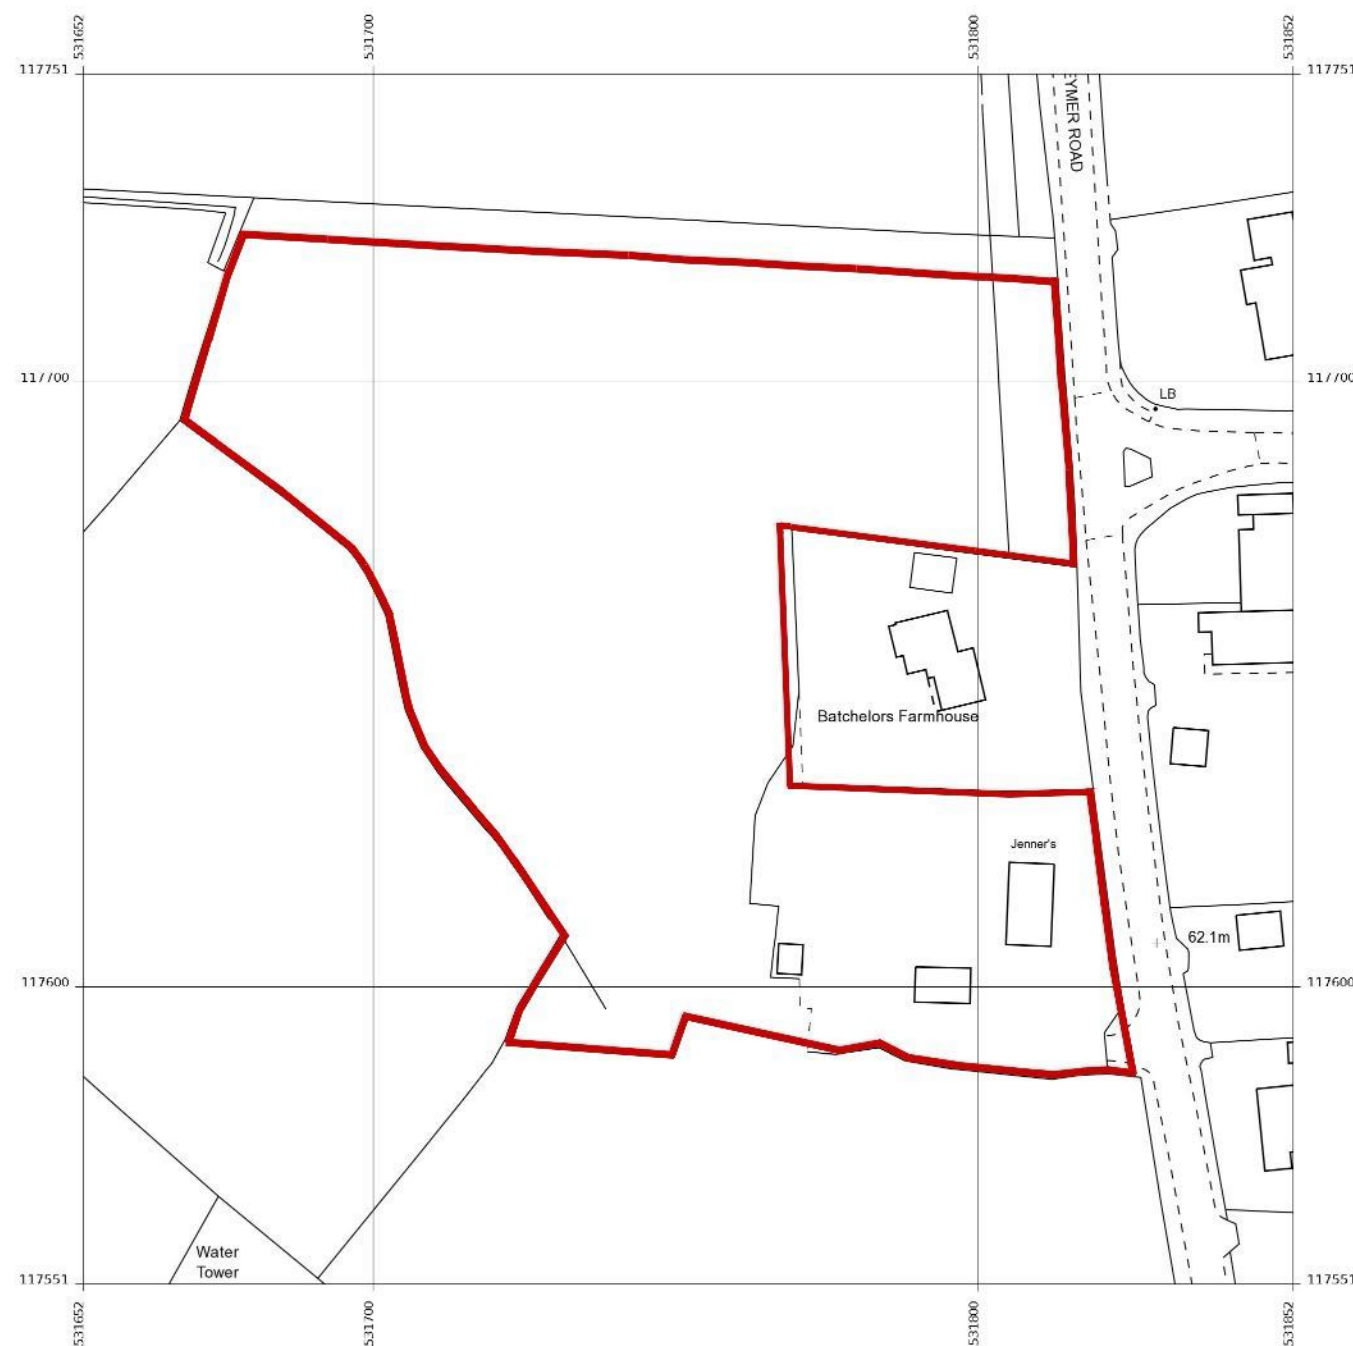

- 5.9 To conclude this Transport Statement demonstrates that in traffic and transport terms the proposed residential development is sustainably located, and traffic generated by the proposed development will have no material impact on the surrounding highway network.
- 5.10 Accordingly the impact of the proposed development is shown not to be ‘severe’, the test taken from the National Planning Policy Framework.
- 5.11 Based on the above there are no traffic or transport reasons why the proposed 26-residential unit scheme should not be granted planning consent. This would be in line with the previous positive recommendations of ‘no objection’ issued by WSCC, as Highway authority.

Afternoon Joanne,

I hope you had a good Christmas and new year.

After inspection of the revise plans provided (14/119/Blk/B & 14/119/siteC) I would make the following summary comments:

The revised plans accurately reflect the access location points subject of WSCC consultation response dated 03/12/2015. This consultation response discusses in detail the acceptability of these points of access from a highways safety perspective. Therefore no highway safety concerns would be raised to the detailed provided on these revised plans.

Ian Hayward

Hi Ian,

Please see the attached response from the agent in respect of the above application. In this he provides amended plans regarding the site accesses.

Whilst I note that in your response to me of the 3rd and 4th December raised no objection subject to conditions, have you any further comments to add on these plans?

I hope you have a lovely Christmas, and I look forward to hearing from you further.

Kind regards

Joanne

West Sussex County Council takes steps to ensure emails and attachments are virus-free but you should carry out your own checks before opening any attachment.

No worries, please see the advised conditions wording below.

Access

No development shall commence until the vehicular access points serving the development have been constructed in accordance with plans and details submitted to and approved in writing by the Local Planning Authority.

Reason: In the interests of road safety.

Access closure

No part of the development shall be first occupied until such time as the existing vehicular access onto Keymer Road has been physically closed in accordance with plans and details submitted to and approved in writing by the Local Planning Authority.

Reason: In the interests of road safety.

Vehicle parking and turning

No part of the development shall be first occupied until the vehicle parking and turning spaces have been constructed in accordance with plans and details submitted to and approved in writing by the Local Planning Authority. These spaces shall thereafter be retained for their designated use.

Reason: To provide adequate on-site car parking and turning space for the development.

Cycle parking

No part of the development shall be first occupied until covered and secure cycle parking spaces have been provided in accordance with plans and details submitted to and approved by the Local Planning Authority.

Reason: To provide alternative travel options to the use of the car in accordance with current sustainable transport policies.

Visibility (Northern Access)

No part of the development shall be first occupied until visibility splays of 2.4 metres by 150 metres south and 2.4 metres by 120 metres north have been provided at the proposed northern site vehicular access onto Keymer Road in accordance with the approved planning drawings. Once provided the splays shall thereafter be maintained and kept free of all obstructions over a height of 0.6 metre above adjoining carriageway level or as otherwise agreed.

Reason: In the interests of road safety.

Visibility (Southern Access)

No part of the development shall be first occupied until visibility splays of 2.4 metres by 140 south and 2.4 metres by 150 metres north have been provided at the proposed southern site vehicular access onto Keymer Road in accordance with the approved planning drawings. Once provided the splays shall thereafter be maintained and kept free of all obstructions over a height of 0.6 metre above adjoining carriageway level or as otherwise agreed.

Reason: In the interests of road safety.

Wheel Washing

No development shall be carried out on the site unless and until an effective vehicle wheel-cleaning facility has been installed in accordance with details provided by the Local Planning Authority and such facility shall be retained in working order and throughout the period of work on site to ensure the vehicles do not carry mud and earth on to the public highway, which may cause a hazard to other road users.

Reason: In the interests of road safety.

Kind Regards

Ian Hayward

Subject: RE: Strategic Planning Response - DM/15/3955

Hi Ian,

Many thanks for your consultation response concerning the above application.

You recommend 6 conditions should I be minded to recommend the application for approval. Please can you provide the exact wording for each please for our records.

Many thanks

Joanne

Mrs Joanne Fisher BSc (Hons), MATP, MRTPI

Senior Planning Officer

Development Management

Tel: 01444 477330

joanne.fisher@midsussex.gov.uk

How are we doing? We always welcome your [feedback](#)

Working together for a Better Mid Sussex.

From: Ian Hayward [<mailto:ian.hayward@westsussex.gov.uk>]

Sent: 03 December 2015 13:03

To: planninginfo

Cc: Anne Jones

Subject: Strategic Planning Response

Please could this Strategic Planning Response be distributed to the relevant officer please.

I have copied Councillor Jones into this correspondence to ensure that she is aware of issues being raised or events that are happening in her constituency.

Kind Regards

Ian Hayward

APPENDIX K

Calculation Reference: AUDIT-443201-180510-0530

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 03 - RESIDENTIAL
Category : A - HOUSES PRIVATELY OWNED
VEHICLES

Selected regions and areas:

02	SOUTH EAST	
	ES EAST SUSSEX	1 days
	KC KENT	2 days
	SC SURREY	1 days
06	WEST MIDLANDS	
	SH SHROPSHIRE	1 days
07	YORKSHIRE & NORTH LINCOLNSHIRE	
	NY NORTH YORKSHIRE	1 days
08	NORTH WEST	
	CH CHESHIRE	1 days
10	WALES	
	VG VALE OF GLAMORGAN	1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Secondary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: Number of dwellings
Actual Range: 8 to 288 (units:)
Range Selected by User: 5 to 500 (units:)

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/10 to 27/11/17

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	3 days
Tuesday	1 days
Wednesday	1 days
Thursday	2 days
Friday	1 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	8 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

Selected Locations:

Edge of Town	7
Neighbourhood Centre (PPS6 Local Centre)	1

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Residential Zone	6
Village	1
No Sub Category	1

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Secondary Filtering selection:

Use Class:

C3 8 days

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 1 mile:

1,001 to 5,000	1 days
5,001 to 10,000	2 days
10,001 to 15,000	4 days
15,001 to 20,000	1 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

50,001 to 75,000	1 days
75,001 to 100,000	3 days
100,001 to 125,000	1 days
125,001 to 250,000	3 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

1.1 to 1.5	7 days
1.6 to 2.0	1 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

No 8 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present 8 days

This data displays the number of selected surveys with PTAL Ratings.

19:00 - 20:00									
20:00 - 21:00									
21:00 - 22:00									
22:00 - 23:00									
23:00 - 24:00									
Total Rates:	2.657			2.547			5.204		

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. The Company authorises those who possess a current TRICS licence to access the TRICS Database and copy the data contained within the TRICS Database for the licence holders' use only. Any resulting copy must retain all copyrights and other proprietary notices, and any disclaimer contained thereon.

The Company accepts no responsibility for loss which may arise from reliance on data contained in the TRICS Database. [No warranty of any kind, express or implied, is made as to the data contained in the TRICS Database.]

Parameter summary

Trip rate parameter range selected:	8 - 288 (units:)
Survey date date range:	01/01/10 - 27/11/17
Number of weekdays (Monday-Friday):	8
Number of Saturdays:	0
Number of Sundays:	0
Surveys automatically removed from selection:	0
Surveys manually removed from selection:	0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are show. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
