Thank you for re-consulting with Place Services on the above Full planning application. This letter sets out our consultation response on the landscape impact of the application and how the proposal relates and responds to the landscape setting and context of the site.

### **Review of Submitted Information:**

The application has been supported by the submission of “*Amendments made to address the LPA comments*” (dated 8<sup>th</sup> August 2025).

We acknowledge that a full LVIA is not required and that a proportionate LVA is appropriate in this instance. However, it remains essential that any LVA is “*based on clear and transparent methods so that the reasoning applied at different stages can be traced and examined by others*” (GLVIA3, Para 2.24). The absence of clear methodology and judgements limits the ability to understand how conclusions are reached.

‘No fencing added’ has been clarified for the basins, however knee rails are clearly shown on the boundary treatment plans. As per our previous response, we advise that peripheral vegetation is used to form the boundaries, assuming that the gradients are not too severe.

We otherwise welcome the amendments to the Landscape Strategy.

Please do not hesitate to contact us if you have any queries in relation to this advice.
