With reference to the above planning application I would seriously object to the installation of a lattice Mast adjacent to Rocky lane This would have a significant overbearing impact and loss of outlook towards the South Downs national park along with double the height of the mature trees nearby, I see that there is no purpose or any gain for this mast to be installed to provide a few seconds of phone signal for the train line there is already a 5G mast situated at the bridge of Rocky Lane 0.4 miles (640m) away from the proposed site Highway safety issue concerns has access to the proposed mast will be off Rocky Lane on a bend in the road This will be far most intrusion into the country side and a visual impact to the character and appearance of the surrounding area Kind Regards [REDACTED]
