Sussex

Dear Stephen Ashdown

I am sending a few subjects, which I feel are particularly important for many of the residents of Cuckfield and Ansty. As I've been living in the area for years I feel extremely strongly.

1 The proposed development next to Cuckfield would be a tragedy. The population of Cuckfield is around 3,500. The population of the development would be the same sort of size. Cuckfield is a very historic village which has been continuing from Saxon-times and would be destroyed by the horrific buildings/cars next door to it.

2 The massive effect on the environment. This possible development would damage the countryside very seriously, having a considerable loss to the ecology and wildlife. This is extremely important for many woodlands, parklands, the small low-lying fields, streams, High Weald and even the South Downs which would have serious effects.

3 Lack of GP's, no idea of secondary education, poor bus service, car traffic disaster!

Just a few important things I wanted to point out, even though there's a lot more to say.

Yours sincerely
