[REDACTED]

I am contacting you regarding the planning consent granted for 198 homes in Bolney on the land of Foxhole Farm.

As a long standing resident of the village, I understand the importance of community and bringing the village together. The village has a relatively new village hall which does this so well with its regular events, cafe and special events during the year. I therefore see no reason for the developer to propose building a community hub as part of the S106 agreement.

We would want the new residents to feel part of the village rather than alienating them. The money would be far better spend on providing more community buses to transport hubs on a more regular basis.

I feel that it would be prudent to hold a consultation with the village so that this and other points raised could be discussed.

Regards
