Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	Having familiarized myself with the vast range of health risks associated with the radiofrequency electromagnetic fields from similar 5G installations, I am deeply concerned for the way that this infrastructure would impact my health as well as the health of my husband and children. I am specifically worried for the possible carcinogenic impacts as well as effects on fertility.

Therefore, I formally object this proposal.

Moreover, it has been brought to my attention that a much better site has previously been considered for the same purpose - DM/24/0880. I would like to encourage you to revisit the possibility of selecting this site as opposed to DM/25/1495, as this would solve all the concerns regarding the very close proximity of the transmitter as well as allow for a better signal for the Brighton Main Line trains.

Kind regards
