Dear Andrew,

Please find comments attached regarding Great Crested Newt licensing in relation to proposed development. These are 'comments only' and do not place an objection against the application.

I also request that when the application is suitably ready to be determined, the following Informative be added if the applicant has chosen not to pursue any of the options contained within the attached document:

'This development has potential to impact Great Crested Newts as there are ponds/waterbodies and suitable habitat within 500m of the development. If Great Crested Newts are discovered during development, all works must cease until advice has been sought from a suitably qualified ecologist, as failure to do so may result in prosecutable offences being committed.'

Please do not hesitate to contact me with any queries.

Kind regards,

Sam Hardy (he/him)
