

Heritage Statement 2025:

- The property was built in 1919 and designed by a famous architect (Sir Ashton Webb) that being the reason the properties were listed [Grade II listed] residence, located in East street Turners Hill, and retains numerous original and sympathetic architectural features. The garage, situated within the curtilage of the listed building, is currently open and used for the parking of a private vehicle.

Proposal: To enhance the security of the property and safeguard the vehicle housed within the garage, we propose the installation of black wooden barn type door. With leaded light windows to match the house, this will be sympathetic to the existing aesthetics of the building, echoing the black aluminium-framed windows already in place.

Impact Assessment: The works required to fit the door are minimal and fully reversible. Two post rails will be fixed discreetly to the faces of the existing brick pillars, ensuring no damage to original fabric.

The proposed installation respects the architectural integrity of the heritage asset and its contribution to the character of the area, while addressing contemporary security needs in a sensitive and unobtrusive manner.
