Biodiversity net gain

Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 sets out that every planning permission granted for the development of land in England shall be deemed to have been granted subject to the 'biodiversity gain condition' requiring development to achieve a net gain of 10% of biodiversity value.

This is subject to exemptions, an exemption applies in relation to planning permission for a development which is the subject of a householder application, within the meaning of article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order (2015)*.

Applicants for planning permission are required to make a statement as to whether they believe the biodiversity gain condition will apply if permission is granted, please confirm:

- ☒ It is my belief that if permission is granted for the development to which this application relates the biodiversity gain condition would not apply

*A 'householder application' means an application for planning permission for development for an existing dwellinghouse, or development within the curtilage of such a dwellinghouse for any purpose incidental to the enjoyment of the dwellinghouse which is not an application for change of use or an application to change the number of dwellings in a building.

Loft Conversion

With regard to loft conversions and roof extensions, Principle DG52 of the Mid Sussex Design Guide notes that:

'A loft conversion is a space efficient means of extending the amount of living accommodation in a dwelling. Roof accommodation is normally reliant on dormer windows and rooflights to provide light and ventilation. However, if they are out of scale or out of character with the roofscape and proportions of a dwelling they can have an adverse impact on the character of both the dwelling and the streetscape.

The roof pitch and form are intrinsic to a building's character and roof extensions should be sensitive to this. Roof extensions and dormer windows that alter the existing ridge of the roof or significantly alter the roof profile of a building will not normally be acceptable, particularly on the front roof slope, and where there is a strong established roofline.

Where a clear rhythm of fenestration is established, the position and proportion of dormer windows should respond to existing windows and / or doors.'

The existing terrace is considered to display a degree of uniformity throughout with the predominant roof type being hipped roofs, especially to the side roof slopes. It is therefore considered that a hip to gable alteration would unbalance the terrace and appear incongruous within its wider context. As such, this alteration would not likely be viewed favourably under a planning application.

There are a number of existing dormers at second floor level throughout the terrace which are considered to be designed in order to reflect one another. The addition of further dormers above at second floor level would likely appear crowded when viewed with the existing dormers below. In any instance, the addition of an alternative design of dormers would disrupt the uniformity currently displayed throughout the terrace. There may be scope for the addition of an appropriately designed rear dormer, taking cues from the dormer design to the front. This is due to the rear elevations visually discrete position with regard to the street scene and therefore a more appropriate position for a dormer addition.

Front Extension

The existing dwelling appears to have a front hipped canopy element to the principal elevation which projects out but is not infilled. A front extension should only be limited to infilling and bricking up this existing element as opposed to increasing the projection out further towards the roadside.

Rear Extension

The principle of a single storey rear extension with a projection of 1.3m is considered to be acceptable subject to further details. It is encouraged that matching materials to the extension are used in order to help the proposal assimilate with the existing.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff**
- (b) an elected member**
- (c) related to a member of staff**
- (d) related to an elected member**

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?

☒ Yes

☐ No

If yes, please provide details of their name, role, and how they are related:
