Subject: RE: DM/24/2762 - Wintons Fishery Folders Lane Burgess Hill

Good morning Joanne,

Please see below from our drainage consultant to explain how they have modelled the site in both 1D and 2D.

Figure 2 of the report shows the watercourses modelled in 1D in blue.

The model was done for the site shown in the Figure above and these were the only watercourses we had in the topo. The rest is modelled in 2D using LiDAR which gives a good representation.

Cutting sections from LiDAR and assuming structure dimensions won't provide a better representation of the floodplain as there is too much uncertainty.

Best wishes,
Xanthe

Dear Xanthe,

I refer to the above application currently under consideration and the Hydraulic Modelling Technical Note received on the 22nd August.

Please find attached the comments from the Council's Drainage Engineer. In this they are requesting further information as detailed in the attached.

I look forward to receiving this from you.

Kind regards

Joanne
