Comments Details

Comments: The environmental impact of concern from this proposal is noise affecting nearby residents. The noise impact assessment prepared by Evolved Acoustics dated 27/11/2025 (report reference EV2543-01-B) is therefore welcomed. The methodology and conclusions of the report are noted and accepted. Noise mitigation measures are recommended within the report to minimise the likelihood of adverse noise impact. I recommend these are required as part of the development to protect local amenity.

Prior to the commencement of the development hereby permitted, a scheme for protecting the nearby residents from noise from the use of the cricket nets that implements the measures described in the noise impact assessment by Evolved Acoustics reference EV2543-01-B dated 27/11/2025, shall be submitted and approved in writing by the Local Planning Authority. All works, which form part of the approved scheme shall be maintained in accordance

with the approved details. This shall include acoustic screening, signage and a maintenance schedule.

The Noise Impact Assessment states that the use of the nets are normally between 17:30 and 20:30 hrs and it is presumed the impact assessment has been prepared on this basis. I therefore recommend that you include a condition prohibiting use of the nets after 20:30 hrs.

Kind regards
