Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	The potential hazards of 5G radiation from the mast is huge due to its proximity to the local residential areas. The residential areas nearby are young which comprise many families with children. The local area is also a popular destinations for retired living. Both young and elderly people are specially vulnerable to the hazards caused by radiation. The mast is designed to be a lot higher than the trees around and is bound to damage the natural scenery

nearby. The mast serves little purposes as far as the local residents are concerned as it mainly serves the railway. To conclude, the location of the mast is an utterly bad choice and a irresponsible one in complete neglect of the welfare of the local people

Kind regards
