Dear Katherine

I have only just received this letter and found out that I need to submit this by tomorrow. We are putting forward our various comments regarding this proposed Diagnostic centre. We live opposite the Queen Vic hospital and this is going to impact our lives. There is going to be a lot of extra noise building works etc directly opposite my bedroom. There is also extra traffic noise and pollution directly opposite my house. More traffic means people will want to park outside the neighbouring streets causing issues for us residents. This is 7 days a week. We also don't know what noise this centre is going to cause. I work from home and need a quiet office environment. I also don't know what machines are getting installed they could emit radiation. MRI and X-ray machines emit this intensely. We were given very little time to oppose this but myself and partner are opposing this, and are requesting this be put somewhere else on the property not in front of my house also causing a bad view.

Regards
