Description of the Proposal

Please note in regard to:

- **Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).
- **Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- **Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or [view government planning guidance on determination periods](#).

Description

Please describe details of the proposed development or works including any change of use

Upgrade the existing clubhouse by increasing the size of the east facing windows, installing bifold doors to the south elevation, replacing the old paving stones in the external viewing area with modern composite decking and changing the entry point to the clubhouse from the east elevation to the south elevation. Replace the existing felt roofing tiles with a light weight artificial slate roof. This artificial slate roof will only be constructed if funds allow.

Biodiversity and Geological Conservation

Is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

To assist in answering this question correctly, please refer to the help text which provides guidance on determining if any important biodiversity or geological conservation features may be present or nearby; and whether they are likely to be affected by the proposals.

a) Protected and priority species

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

b) Designated sites, important habitats or other biodiversity features

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

c) Features of geological conservation importance

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:
Under 25 square metres

Please justify the reason why biodiversity net gain does not apply:
No new development on site, no change to existing site layout.

Note: Please read the help text for further information why developments may be exempt or not in scope.

Pre-application Advice

Has assistance or prior advice been sought from the local authority about this application?

Details of the pre-application advice received

The current proposal is for works to alter and upgrade the building and its context including:

Replace and enlarge the existing timber framed windows to the side of the building with larger, aluminium framed units (n.b. in the pre-app submission this is described as the west side of the building, but I believe this to be an error);

Replace existing timber framed double doors to the south with aluminium framed bifold doors;

Replace the felt roof tiles with plastic slate effect tiles;

Relocate the main entrance to the south of the building (described as north in the pre-app submission but again I believe this is an error); and

Replace the current concrete paved patio to the southern side of the building with composite decking surrounded by a low wall.

To consider these works in turn:

The replacement of and alterations to the proportions of the windows to the eastern side of the building are not considered contentious in principle. Aluminium is not always considered an appropriate material within a Conservation Area context but in the context of a modern building of this nature I do not consider it contentious, subject to detail.

Likewise the replacement of the south facing doors is not considered contentious, subject to detail.

Although I would not object to the replacement of the existing felt roof tiles with a more durable material, plastic slate effect tiles will not be considered appropriate in the context of the Conservation Area. This part of the building is arguably the most prominent in views looking south from the Recreation Ground, and a material more sympathetic with the traditional palette found within the wider Area should be used. Natural slate would be an option which would be more favourably viewed.

The relocation of the entrance is not considered contentious.

The works to the patio area are not considered contentious subject to detail of materials, including of the wall.

In summary, the works are not considered contentious in principle, but the proposed replacement roofing material requires reconsideration. Subject to this, and to further detail in some respects, the works would be considered to preserve the character and appearance of the Conservation Area, meeting the requirements of District Plan Policy DP35 and the relevant paragraphs of the NPPF.

CONCLUSION

Based on the comments above , I would encourage an application to be submitted, subject to reconsideration of the replacement roofing material.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
