TPO Details

Are you seeking consent for works to tree(s) subject to TPO	Yes
Are you wishing to carry out works to tree (s) in a conservation area?	Yes
If you know which TPO protects the tree (s), enter its title or number	
Please identify the tree (s) and provide a full and clear specification of the works you want to carry out	In the woodland area to the rear of the applicants address amongst the mature oak trees there is an abundance of Ash, Hazel and Holly. Consultation with the above named agent has identified that all of the Ash trees within the woodland area are showing signs of Ash dieback. (Approx 20 trees in total) Of those Ash trees approximately half (Approx 10 trees) are of an advanced stage of Ash dieback, requiring unavoidable felling due to the state of the Ash trees being too poor for a tree surgeon to safely ascend and remedy. One of the trees exhibiting an advanced state of Ash dieback is near to the B2118 road and some overhead cables. It is proposed to fell that one tree soonest, and then follow on with work to the remaining advanced stage trees, with further follow up work ongoing to manage the whole amount of Ash trees affected that are within the woodland area.
