Dear Sir/Madam,

Proposal: Construction of 2 no houses with detached garages.

Site: Land To Rear Off Chideok, Valebridge Road, Burgess Hill, West Sussex, RH15 0RT

Thank you for your correspondence, please see our comments below regarding the above application.

Development Site is not within Southern Water's Supply Area

The development site is not located within Southern Water's statutory area for water supply drainage services. Please contact South East Water who are the relevant statutory undertaker. Existing Water Main - tree, buildings, assets within stand-off distance

Existing Water Main - tree, buildings, assets within stand-off distance

The 150 mm diameter water main requires a clearance of 3 metres on either side of the water main to protect it from construction works and to allow for future maintenance access.

No excavation, mounding or tree planting should be carried out within 3 metres of the external edge of the public water main without consent from Southern Water. All existing infrastructure, including protective coatings and cathodic protection, should be protected during the course of construction works. Please refer to: <https://www.southernwater.co.uk/media/st5orjvm/stand-off-distances.pdf>

Condition

In order to protect public sewers, Southern Water requests that if consent is granted, the following condition is attached to the planning permission; The developer must agree with Southern Water, prior to commencement of the development, the measures to be taken to protect the public sewers.

Tree planting

We have restrictions on the proposed tree planting adjacent to Southern Water sewers, rising mains or water mains. Reference should be made to Southern Water's publication "A Guide to Tree Planting near water Mains and Sewers" (https://www.southernwater.co.uk/media/pddob0vn/ds-tree-planting-guide-1_nwm.pdf) and the Sewerage Sector Guidance (<https://www.water.org.uk/sewerage-sector-guidance-approved-documents/>) with regards to any landscaping proposals and our restrictions and maintenance of tree planting adjacent to sewers, rising mains and water mains.

Condition

In order to protect public apparatus, Southern Water requests that if consent is granted, the following pre commencement condition is attached to the planning permission; The developer must advise the local authority (in consultation with Southern Water) of the landscaping proposals in proximity of public apparatus in order to protect it in accordance with Southern Water's guidance, prior to the commencement of the development..

Connection to public sewer - capacity available desktop study under 50

Southern Water has undertaken a desktop study of the area, and our investigations indicate that Southern Water can facilitate foul sewerage /surface water run off disposal to service the proposed development. Southern Water requires a formal application for a connection to the public sewer to be made by the applicant or developer.

To make an application visit Southern Water's Get Connected service:

<https://developerservices.southernwater.co.uk> and please read our New Connections Charging Arrangements documents which are available on our website via the following link:

<https://www.southernwater.co.uk/developing-building/connection-charging-arrangements>

We request that should this planning application receive planning approval, the following informative is attached to the consent: Construction of the development shall not commence until details of the proposed means of foul sewerage and surface water disposal have been submitted to and approved in writing by the Local Planning Authority in consultation with Southern Water.

Proposed soakaways

The Council's Building Control officers or technical staff should be asked to comment on the adequacy of soakaways to dispose of surface water from the proposed development. No new soakaways should be located within 5 metres of a public or adoptable gravity sewer, rising main or water main.

No Soakaways should be connected to the public surface water sewer.

Hierarchy of Building Regulations H3 for disposal of surface water - not yet provided documentation proving compliance

If the applicant has not already provided documentation demonstrating compliance with the surface water hierarchy reflected in part H3 of the Building Regulations, as shown below, we will require this to be provided where surface water is being considered for discharge to our network. Whilst reuse does not strictly form part of this hierarchy, Southern Water would encourage the consideration of reuse for new developments.

- Reuse
- Infiltration
- Watercourse
- Storm Sewer
- Combined Sewer

Guidance on Building Regulations is here: <https://www.gov.uk/government/publications/drainage-and-waste-disposal-approved-document-h>

We would like to engage with you on the design for disposal of surface water for this development at the earliest opportunity and we recommend that civil engineers and landscape architects work together and with Southern Water. In many cases this may negate or reduce the need for network reinforcement and allow earlier completion of the development.

Where a surface water connection to the foul or combined sewer is being considered, this should be agreed by the Lead Local Flood Authority, in consultation with Southern Water.

Condition

We request that should this application receive planning approval, the following condition is attached to the consent: Construction of the development shall not commence until details of the proposed means of surface water run off disposal in accordance with Part H3 of Building Regulations hierarchy as well as acceptable discharge points, rates and volumes have been agreed by the Lead Local Flood Authority, in consultation with Southern Water.

For further advice, please contact Southern Water, Southern House, Yeoman Road, Worthing, West Sussex, BN13 3NX (Tel: 0330 303 0119)
