Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	I would like to reaffirm my support for this planning application following the revised proposals. I welcome the amendments that have been made, particularly the reduction in the number of dwellings. It is encouraging to see that the applicant has listened to feedback and refined the scheme, resulting in a proposal that strikes an even better balance

between delivering much-needed homes and respecting the character of the village.

The recently completed first phase of the development has, in my opinion, been a real success. It has provided 20 high-quality new homes and has welcomed 20 new families into Ansty. Those families are now part of the community, supporting village life. It demonstrates that carefully planned development can strengthen a rural community rather than detract from it.

This revised proposal is a natural continuation of that successful development. It offers another opportunity for families to become part of this wonderful village while extending an existing residential area in a logical and well-planned way. The design is attractive, the layout is sympathetic to its surroundings, and it sits comfortably alongside the homes that have already been built.

The revised plans show that the applicant has been willing to respond positively to comments, and I believe the proposal now represents an even stronger scheme. It will provide much-needed homes while respecting the existing character of the village and building on the success of the first phase.

For these reasons, I fully support this application and sincerely hope it is approved.

Kind regards
