Report Ref: 60610807-ACM-HGN-FAIR-RP-SA-0001

Dear Nana,

Fairbridge Way, Burgess Hill – Pedestrian and Cycle Access: Stage 1/2 Road Safety Audit (FINAL)

Please find enclosed the final Stage 1/2 Road Safety Audit for the above scheme.

In addition to the problems raised within the audit report, we wish to raise the following point which was considered to be outside the scope of this road safety audit:

- The drawings provided show the intervisibility splays between road users heading west on Fairbridge Way and the northern waiting area of the crossing passing through an area of significant vegetation growth. Whilst it is acknowledged that this is Homes England owned land, nonetheless, care needs to be taken to ensure appropriate levels of intervisibility are achievable once the crossing is in place.

If you have any queries, please do not hesitate to contact me.

Yours sincerely
For **AECOM Limited**
