

A

Timber Cladding: Parklex Prodema Naturclad-W (Hazel Matte)

The best technical characteristics for exterior cladding

NATURAL WOOD

NATURCLAD-W has natural wood surface layer 0.6mm thick. NATURCLAD-B is manufactured with a natural wood veneer. They offer the aesthetic naturalness that wood-imitation solutions cannot provide.

RESISTANT TO EXTREME ATMOSPHERIC AGENTS

After 3,000 hours of exposure, the material should have a rating variation of >4 in appearance, and a rating of 3> in contrast (EN 438-6:2005).

NATURCLAD-W and NATURCLAD-B attain these values following exposure of up to 5 times greater than regulatory requirements.

SUSTAINABLE

Can be supplied with the PEFC Certificate (Program for the Endorsement of Forest Certification) and has the EPD (Environmental Product Declaration).

We have a document with information on the product's compliance with LEED credits.

MAINTENANCE FREE

The surface composition of the boards protects the wood from the most extreme weather conditions, eliminating any need for subsequent treatment.

B

Clay Tiles: Plasma (M25 brown)

Plasma^(↵)

HARMONY AND SIMPLICITY FOR EXQUISITE SOLUTIONS

Having been the first flat roof tile model, of pure forms and geometry, to be manufactured in Southern Europe, Plasma is the reference brand in its market segment.

Its contemporary design combines harmony and simplicity, beauty and class. Furthermore, its exceptional range of fittings elevate the technical performance of this line, resolving the challenges of both roof and facade.
