[REDACTED]  
Ref planning application DM/25/1129 Foxhole lane, Bolney

Dear Sirs,

In addition to my e mail regarding my objection to the above-mentioned planning investigation I would like to ask if an Asbestos survey has been carried out on this site.

I ask because in the northern field of the proposed site is an open barn structure that has a damaged roof that appears to be made of asbestos. Has the ground beneath this structure been tested for the presence of asbestos?

Further more on the crest of the hill on Foxhole Lane between the two fields that make up the proposed development there are "farm buildings" which again appear to be clad with sheeting that may well be made from asbestos.

I await your response.

Kind regards
