Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	I am writing to you to formally object to the proposed addition of windows to the 'warehouse' addressed 13 Beaconsfield close. Previous proposals to develop the site have been approved despite the site sitting in an island of private property with absolutely no access for vehicles. However none of these approved designs featured windows looking directly into other properties. The proposed design would be completely overbearing and would
-----------	--

of course be intrusive.

The design would add a 1st floor window with a direct view into my home. The living room area, kitchen, bathroom and rear bedroom and garden would be directly looked into from only a few metres away.

The site sits in what I understand to be a conservation area.

Somehow, incrementally the site has, through numerous applications been allowed various planning permissions by mid sussex.

The original and protected pug mill was given permission to be destroyed and a warehouse built in it's place.

Then, the current warehouse (surrounded by private land and with no access for pedestrians, vehicles, no access to the sewerage network) and with objections from all surrounding neighbours including Stockwell court (who have the only possible vehicle access) was given permission for 2 houses.

I cannot see any possible justification for allowing this latest design change to the warehouse which will, unlike the previous designs encroach on so many residents privacy.

I would like to request a site visit as I believe this will clearly show the impact of the proposed windows to local residents privacy and the negative look of windows in an industrial building in the middle of a residential area.

Kind regards
