Please find below our comments on the planning application DM/23/2867.

At first sight this application seems to make no sense. It is not obvious what it offers of value that residents do not already enjoy. In fact it seems like a solution in search of a problem.

Of course you can understand it better in conjunction with the other planning application from Fairfax for a large housing development. You can then see this as an attempt to compensate for some of the biodiversity that would be destroyed by that project.

I cannot believe that anyone would be taken in by this clumsy effort.

When, as we believe the Council will rightly decide, the housing development proposal is rejected in line with the wishes of the vast majority of residents, then this application will become irrelevant.

Regards,
