

T1 Thuja Conifer Tree - The tree (~12cm) is in poor condition as it is being out competed by adjacent the larger (~20cm) Tulip tree. The proposal is to fell T1 Thuja and replace it with *Griselina Littoralis* at the boundary to match the same tree that is planted along our next door neighbour's boundary to give a consistent appearance.

Our neighbour, who had advised us of her intention to plant additional *Griselina Littoralis* along the boundary is in favour of removing the Thuja given its poor condition.
