Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Mid Sussex District Council planning decisions with regard to potential ecological impacts from development. Any additional information, queries or comments on this advice that the applicant or other interested parties may have, must be directed to the Planning Officer who will seek further advice from us where appropriate and necessary.

Application: DM/25/1023
Location: Crabbet Park Equestrian Centre Turners Hill Road Turners Hill Crawley
Proposal: The demolition of the existing site office and construction of a single dwelling and associated works.

Thank you for consulting Place Services on the above full application.

Subject to Natural England's formal comments on the conclusion of the LPA's Appropriate Assessment	☐

Summary

We have reviewed the documents supplied by the applicant, relating to the likely impacts of development on designated sites, protected & Priority species and habitats and identification of proportionate mitigation.

We are not satisfied that there is sufficient ecological information available for determination of this application and recommend that details of survey results, mitigation & enhancement measures are required to make this proposal acceptable is provided prior to determination. The reasons for this are outlined below:

Protected Species:

The Preliminary Ecological Appraisal and Roost Assessment submitted in support of this application identifies Building B1 as having high suitability for roosting bats, including features capable of supporting maternity roosts for crevice-dwelling species. However, due to health and safety constraints, no internal inspection was undertaken, and no emergence or re-entry surveys have been completed to confirm presence or likely absence.

To fully assess the impacts of the proposal the LPA needs ecological information for the site, particularly for bats, a European Protected Species. These surveys are required prior to determination because Government Standing Advice indicates that you should *“Survey for bats if the area includes buildings or other structures that bats tend to use or there are trees with features that bats tend to use nearby”*.

The results of these surveys are required prior to determination because paragraph 99 of the ODPM Circular 06/2005 highlights that: *“It is essential that the presence or otherwise of protected species, and the extent that they may be affected by the proposed development, is established before the planning permission is granted, otherwise all relevant material considerations may not have been addressed in making the decision.”*

This information is therefore required to provide the LPA with certainty of likely impacts on legally protected species and be able to secure appropriate mitigation either by a mitigation licence from Natural England or a condition of any consent. This will enable the LPA to demonstrate compliance with its statutory duties, including its biodiversity duty under s40 NERC Act 2006 (as amended) and prevent wildlife crime under s17 Crime and Disorder Act 1998.

Furthermore, the Local Planning Authority, as a competent authority, should have regard to the requirements of The Conservation of Habitats and Species Regulations 2017 (as amended) when reaching planning decisions and must not leave this until the licence application stage. Therefore, if a European Protected Species Mitigation Licence is required for this application, appropriate mitigation measures to support the provision of the licence must also be outlined prior to determination to allow certainty to the LPA that a licence will likely be granted.

This is needed to enable the LPA to demonstrate its compliance with its statutory duties including its biodiversity duty under s40 NERC Act 2006 (as amended).

We look forward to working with the LPA and the applicant to receive the additional information required to support a lawful decision and overcome our holding objection.

Please do not hesitate to contact us if you have any queries in relation to this advice.
